INTRODUCTION

Establishment of the Eleventh Circuit

With the passage of the Fifth Circuit Court of Appeals Reorganization Act of 1980 (Public Law 96-452, effective October 1, 1981), the Fifth Circuit was reorganized into two circuits - the new Fifth Circuit, composed of the districts of Louisiana, Mississippi, Texas, and the Canal Zone (this district court officially closed on March 31, 1982, pursuant to Panama Canal Act of 1979, P.L. 96-70, signed September 27, 1979); and the Eleventh Circuit, composed of the districts of Alabama, Florida, and Georgia. On October 1, 1981, the Court of Appeals for the Eleventh Circuit, located in Atlanta, Georgia, officially began operations, handling a workload of administrative appeals and appeals of U.S. court decisions from the states within its jurisdictional boundaries.

In this report, statistics on the caseload of the U.S. courts of appeals, U.S. district courts, and U.S. bankruptcy courts reflect this reorganization as though it were in effect for the entire twelve month period ended March 31, 1982. Data for each district court and bankruptcy court affected are fully comparable to data of prior periods. Courts of appeals statistics are also reflected as if the reorganization was in effect the entire period. Only civil and criminal appeals, however, are directly comparable to figures for earlier years. Because original proceedings and administrative agency appeals could not be readily differentiated according to origin, prior to July 1, 1980, revision of the historical data on these matters has been approximated based on information provided by the circuits and other available material.

U.S. COURTS OF APPEALS

Summary of Workload

During the twelve month period ended March 31, 1982, the number of appeals filed and terminated in the U.S. courts of appeals continued to reach record levels. Part of the increase in case activity can be attributed to the 1979 change in the **Federal Rules of Appellate Procedure** which required the courts of appeals to docket an appeal upon receipt of the notice of appeal from the lower court. To accommodate this change, the courts of appeals reporting criteria were modified on July 1, 1980 to allow for the inclusion of certain types of cases that were not included in prior years.

In the past twelve months, a total of 27,555 appeals were filed in the U.S. courts of appeals, a rise of 10.8 percent over the 24,879 appeals filed in 1981. Appellate terminations grew a substantial 13.7 percent during the year, up from 23,854 appeals in 1981 to 27,120 in 1982. Even with a sizable increase in case dispositions, the courts of appeals experienced a 2.0 percent increase in the pending caseload. A total of 22,088 appeals were pending on the dockets at the end of the twelve month period, up slightly from the 21,653 appeals recorded in 1981. Table 1 is a comparison, by circuit, of the appellate workload during the twelve month periods ended March 31, 1981 and 1982. Appendix Table B-1 is a more detailed table on the appellate workload in 1982.

Table 1
U.S. Courts of Appeals
Appeals Commenced, Terminated, and Pending
During the Twelve Month Periods Ended March 31, 1981 and 1982

Circuit	Filings			Terminations			Pending

Eleventh	2,181	2,448	12.2	2,075	2,145	3.4	2,105	2,408	14.4

Filings

During the twelve month period ended March 31, 1982, the total number of cases filed in all courts of appeals rose 10.8 percent over the previous year. The largest increases in filings were reported in the Fourth and First Circuits, up 22.2 percent and 20.4 percent, respectively. Only one circuit, the District of Columbia, reported a decline in case filings during the year, dropping 11.4 percent to 1,418 appeals. This decrease resulted largely from a 38.8 percent drop in new administrative agency filings during 1982. Of the remaining circuits, seven recorded filing increases greater than 10.0 percent.

The largest growth among the various types of appeals was shown in bankruptcy appeals, rising 25.4 percent from 389 case filings in 1981 to 488 case filings in 1982. Other significant increases during the year were reported in U.S. civil appeals (up 17.2 percent); private civil appeals (up 13.8 percent); and original proceedings (up 13.5 percent). Administrative agency appeals, the area with the largest increase in filing activity a year ago, was the only category of appeals to experience a decrease in 1982. A total of 3,273 administrative agency filings were reported during the year, down 8.0 percent from the 3,559 filings reported in 1981.

Quarterly Comparison

Table 2 is a comparison of appeals commenced, by quarter, during each of the twelve month periods ended June 30, 1977 through 1981 and the first three quarters of statistical year 1982. The 6,763 appeals filed during the period January through March 1982 were 1.7 percent greater then the 6,653 cases filed during the same period last year. This 1982 total represents the highest number of case filings ever recorded in a January through March period.

Table 2
U.S. Courts of Appeals
Appeals Commenced by Quarter,
1977 through 1982

Statistical Year	First Quarter (Jul-Sept)	Second Quarter (Oct-Dec)	Third Quarter (Jan-Mar)	Fourth Quarter (Apr-Jun)	Twelve Month Total
1977	4,853	4,612	4,953	4,700	19,118
1978	,824	4,480	4,619	4,995	18,918
1979	5,144	4,806	5,146	5,123	20,219
1980	6,264	5,472	5,709	5,755	23,200

1982	7,016	6,646	6,763	-	-
Percent Change 1982 over					
1981	11.9	5.3	1.7	-	-
Percent Change 1981 over					
1980	0.1	15.3	16.5	23.9	13.6
1977	29.2	36.8	34.3	51.7	37.9

Dispositions

Total appellate dispositions rose considerably during this twelve month period with 11 of the 12 courts of appeals reporting increases in terminations. The largest increases in case dispositions were reported in the Eighth Circuit (up 34.9 percent); the First Circuit (up 30.3 percent); the Seventh Circuit (up 24.6 percent); and the Fifth Circuit (up 21.1 percent). The Third Circuit was the only appellate court to record a decline in termination activity, down 8.4 percent to 1,775 appeals. Among the remaining seven circuits, the rate of increase ranged between 3.4 percent and 17.0 percent.

Pending Caseload

During the past year, there were 435 more appeals filed than were terminated in the U.S. courts of appeals. This pushed the pending appellate caseload up to 22,088 appeals, a rise of 2.0 percent over last year. Although the overall pending appellate caseload increased, five courts were able to reduce their pending caseloads during the year. These circuits were the District of Columbia (down 16.4 percent); the Ninth Circuit (down 8.8 percent); the Fifth Circuit (down 8.1 percent); the Second Circuit (down 3.4 percent); and the Eighth Circuit (down 1.3 percent).

The most significant growth in pending caseload occurred in the Third Circuit, up 33.0 percent over last year. This increase resulted mainly from a 13.8 percent increase in filings along with a 8.4 percent decrease in terminations. The rate of increase for the other six circuits experiencing increases varied considerably from a low of 5.9 percent in the Sixth Circuit to a high of 15.8 percent in the First Circuit.

Cases Disposed of After Hearing or Submission

During the twelve month period ended March 31, 1982, the U.S. courts of appeals disposed of 12,529 appeals after oral hearing or submission on briefs, an increase of 14.4 percent over the 10,950 appeals reported in 1981. Of all the yearly case dispositions, 46.2 percent were terminated by this method, a slight increase over the 45.9 percent recorded a year ago.

CASES UNDER SUBMISSION IN THE COURTS OF APPEALS
AND
OTHER FEDERAL COURTS

Compared to a year ago, the overall number of cases under submission has decreased slightly. The U.S. courts of appeals, Court of Claims, and Court of Customs and Patent Appeals reported 747 cases held under submission more than three months on March 31, 1982, as provided in Table 3. This was 3.2 percent less than the 772 cases reported in March 1981. A total of 490 cases (65.6 percent) were held more than three but less than six months; 107 cases (14.3 percent) were held more than six but less than nine months; 77 cases (10.3 percent) were held more than nine months but less than one year; and 73 cases (9.8 percent) were held more than one year. The Ninth Circuit reported 242 cases, 32.4 percent of the total cases under submission. Cases awaiting the submission of additional memoranda or awaiting an opinion in another case are not included in the totals.

Table 3

Court of Claims	10	10	-	-	-
Court of Customs and Patent Appeals	4	4	-	-	-
Temporary Emergency Court of Appeals	-	-	-	-	-
Total on March 31, 1981	772	502	106	90	74

The number of cases under submission over one year at the end of the March quarter has remained at the same level for the last two years, decreasing by only one case from 74 cases in 1981 to 73 cases in 1982.

The Fifth Judicial Circuit was divided into two circuits, the Fifth and the Eleventh, on October 1, 1981. Cases taken under submission prior to that time are listed under the former Fifth Circuit in the accompanying table. In some cases, the panels were made up of judges who are now in different circuits; several cases under submission were heard en banc in the former Fifth Circuit.

U.S. DISTRICT COURTS

CIVIL WORKLOAD

Summary of Workload

During the twelve month period ended March 31, 1982, a total of 197,912 civil cases were filed in the U.S. district courts, an increase of 12.2 percent over the 176,401 cases filed during the same period a year ago. This total represents the largest volume of cases ever filed during a comparable twelve month period. The number of civil cases terminated during the period also rose, increasing 7.2 percent from 172,969 in 1981 to 185,373 in 1982. The civil pending caseload in the U.S. district courts continued to increase, reaching an all-time high of 199,820 cases as of March 31, 1982. This represents an increase of 6.7 percent over the 187,281 cases pending last year. This 6.7 percent rate of increase is up significantly from the 1.6 percent rate recorded in 1981. Table 4 is a comparison, by district, of the number of civil cases filed, terminated, and pending during each of the twelve month periods ended March 31, 1981 and 1982. More detailed data on civil cases filed, terminated, and pending, by district, are provided in Appendix Table C-1.

Civil Filings - Twelve Month Period

The number of civil cases filed in the U.S. district courts has increased steadily over the past 20 years. The 197,912 cases filed during the twelve month period ended March 31, 1982, are more than three times the number of cases filed during the same period in 1960. The 12.2 percent rise in filings over 1981 is highlighted by increases in filings in 80 districts. The most notable increases were in Minnesota (up 98.2 percent); North Carolina, Middle (up 69.5 percent); Arkansas, Western (up 66.5 percent); and Oklahoma, Northern (up 61.2 percent). The rise in filings in these districts is largely the result of increases in the number of recovery of overpayments and enforcement of judgment cases, especially recovery of overpayments of veterans' benefits. Despite the overall increase nationwide, 15 districts experienced decreases in case filings. The most significant declines (excluding the Canal Zone, where the court was phased out effective March 21, 1982) were in California, Southern and the Virgin Islands where filings dropped 27.5 and 15.6 percent, respectively. These declines were the result of reductions in the number of land condemnation and personal injury cases filed, respectively. More detailed data on civil filings, by district and type case, are provided in Appendix Table C-3.

Civil Filings by Nature of Suit

The increase of 21,511 in the number of civil cases filed between 1981 and 1982 can be attributed to significant increases in several case categories. The most extensive rise in case filings was in cases for recovery of overpayments and enforcement of judgments, which rose 67.6 percent to 26,705 cases in 1982. The volume of these cases has increased dramatically since 1979, due largely to efforts by the U.S. to recover defaulted student loans and overpayments of veterans' benefits. Substantial increases in the volume of filings were also experienced in other categories: employment civil rights (up 28.7 percent); prisoner civil rights (up 13.8 percent); and labor litigation (up 11.6 percent). The most significant declines in filing activity were in land condemnation (down 59.4 percent) and fraud cases, including truth in lending (down 21.7 percent). Additional data on civil cases filed, by type of case, are provided in Appendix Table C-2.

Civil Filings - Quarter

Table 5 provides a summary of civil cases filed in the U.S. district courts during each of the three month periods from July 1, 1977 through March 31, 1982. The 51,510 civil cases filed during the three month period January through March 1982 represents an increase of 17.0 percent over the 44,028 cases filed during the same period a year ago and is the largest number ever filed during a comparable three month period.

Table 5
U.S. District Courts
Civil Cases Filed by Quarter,
1977 through 1982

Statistical Year	First Quarter (Jul-Sept)	Second Quarter (Oct-Dec)	Third Quarter (Jan-Mar)	Fourth Quarter (Apr-Jun)	Twelve Month Total

Percent Change 1982 over 1981	11.1	11.4	17.0	-	-

Civil Terminations

During the twelve month period ended March 31, 1982, a total of 185,373 civil cases were terminated in the U.S. district courts. Termination activity has increased steadily since the implementation of the Omnibus Judgeship Act of 1978, which increased the number of judgeships from 399 to 516. Sixty-eight districts experienced increases in disposition activity during the period, led by Minnesota, where terminations jumped 63.2 percent. The increase in Minnesota was primarily in recovery of overpayment and enforcement of judgment cases. Despite the overall growth, termination activity declined in 27 districts. The most dramatic drop in terminations, excluding the Canal Zone, was in Massachusetts, where case dispositions dropped 42.5 percent. The decline was largely the result of a reduction in the number of commerce cases terminated (a record number of these cases was disposed of during the previous twelve month period). Other districts experiencing significant declines in disposition activity were Guam (down 31.5 percent); New York, Western (down 14.7 percent); and the Northern Mariana Islands (down 14.5 percent).

Civil Pending Caseload

As of March 31, 1982, the number of civil cases pending in the U.S. district courts had risen to an all-time high of 199,820 cases, up 6.7 percent from a year ago and approximately twice the number pending only ten years ago. Despite the constant growth in the pending caseload nationwide, 11 districts were able to reduce the number of cases pending from the previous year. The largest reductions, excluding the Canal Zone, were in Florida, Southern (down 34.1 percent); West Virginia, Southern (down 28.6 percent); and California, Southern (down 13.8 percent). These reductions can be largely attributed to declines in the number of pending land condemnation cases (Florida, Southern and California, Southern) and social security cases (West Virginia, Southern). Eighty-four districts experienced increases in the pending caseload over 1981, led by the Northern Mariana Islands (up 57.1 percent) and Nevada (up 41.2 percent). More detailed data on civil cases pending as of March 31, 1982, by district and type case, is provided in Appendix Table C-3A.

Civil Cases Pending Three Years or More

In March 1981, the Judicial Conference re-emphasized its concern over the growing number of civil cases pending three years or more. This has been a topic of special concern since as early as 1963. Over the past 20 years, the number of these cases has risen steadily. As a result of a resolution passed by the Judicial Conference in March 1981, efforts have been increased to dispose of these cases in a timely manner. Table 5 provides a special comparison of civil cases pending three years or more (excluding land condemnation) as of June 30, 1981 and March 31, 1982. There were 35 districts that reduced their three-year-old caseload over the nine month period. The most substantial reductions were in West Virginia, Southern (down 52.9 percent); South Dakota (down 48.5 percent); and Massachusetts (down 48.4 percent).

CRIMINAL WORKLOAD

Summary of Workload

During the twelve month period ended March 31, 1982, the number of criminal cases filed in the U.S. district courts increased by 5.3 percent. There were 31,942 cases filed this year compared to 30,347 last year. Case terminations increased by 4.6 percent, from 28,970 cases terminated in 1981 to 30,305 in 1982. Table 7 shows the criminal case activity during the twelve month periods ended March 31, 1978 through 1980.

Table 7
U.S. District Courts
Criminal Cases Filed and Terminated
During the Twelve Month Periods Ended
March 31, 1978 through 1982

Cases	1978	1979	1980	1981	1982
Filings	37,380	33,100	28,458	30,347	31,942
Terminations	37,298	32,680	27,033	28,970	30,305

Case filings exceeded case terminations by 1,637 cases in 1982, resulting in an increase in the pending caseload at the end of the year. There were 16,885 cases pending on March 31, 1982, which is 10.7 percent more than the 15,248 cases pending on the same day last year. Appendix Table D-1 provides the number of cases and defendants filed, terminated, and pending, by district, during the twelve month period ended March 31, 1982.

During the nine month period from July 1, 1981 through March 31, 1982, there were 23,918 criminal cases filed, a 4.1 percent increase over the 22,973 cases filed during the same period last year. Case terminations increased to 22,900 during the nine month period, compared to 21,659 terminations last year.

Criminal Filings by Major Offense

Appendix Table D-2 provides the number of case and defendant filings, exclusive of transfers, by type of offense. The number of cases filed, excluding transfers, increased by 5.4 percent from 29,395 cases in 1981 to 30,980 cases in 1982.

Case filings increased in most offense categories during the twelve month period ended March 31, 1982, contributing to the overall rise in filings. Increases occurred in 10 of the 15 major offense groups shown in Appendix Table D-2. Filings of embezzlement cases rose by 14.4 percent, the largest increase among offenses. This offense rose from 1,739 cases in 1981 to 1,989 cases in 1982. Prosecutions for auto theft rose by 12.3 percent, with 355 cases filed this year compared to 316 last year.

Prosecutions under the Drug Abuse Prevention and Control Act increased by 11.6 percent, to 3,920 case filings, compared to 3,513 case filings last year. Within this major offense category, prosecutions for marihuana violations rose by 45.3 percent, from 1,046 cases in 1981 to 1,520 in 1982. Case filings for weapons and firearms violations also rose substantially this year. The 1,628 such cases filed in 1982 were 34.8 percent above the 1,208 filings from a year ago.

Criminal Case Filings by District

The number of case filings increased in 53 district courts, decreased in 41, and showed no change in one district court during the twelve month period ended March 31,1982. Table 8 indicates the six districts which had an increase of more than 50 percent in case filings.

Table 8
U.S. District Courts
Districts With an Increase of More Than 50 Percent In Criminal Case Filings
During the Twelve Month Period Ended March 31, 1982

District	1981	1982	Percent Increase
Washington, Western	368	717	94.8
Rhode Island	68	121	77.9
Tennessee, Western	213	354	66.2
Tennessee, Eastern	127	197	55.1
Michigan, Western	98	152	55.1
Missouri, Eastern	161	245	52.2

The increase in filings in Washington, Western resulted primarily from an increase in the number of filings for traffic violations (281 cases). In Rhode Island, the largest increase in an offense category was for fraud with 35 more cases; while Tennessee, Western reported a substantial rise in fraud cases (140 additional cases). In Tennessee, Eastern, the largest increase in offense categories occurred for larceny and for weapons and firearms violations, each having 19 additional filings in 1982. In Michigan, Western; prosecutions for fraud showed an increase of 43 cases. The increase in Missouri, Eastern was spread across several offense categories, with the largest increases occurring in forgery and counterfeiting (19 additional cases) and robbery (17 cases).

Appendix Table D-3 provides the number of cases filed by district and by major offense categories during the twelve month period ended March 31, 1982.

CASES AND MOTIONS UNDER ADVISEMENT IN U.S. DISTRICT COURTS

For the first quarter of 1982, U.S. district judges reported 1,520 matters held under advisement over 60 days, a 4.6 percent increase over the 1,453 matters reported last year. Some of this increase is attributable to the number of judges who reported this quarter. There were 555 district judges, including 119 senior judges, who reported on the status of matters before the court, compared to the 535 district judges for the same quarter last year (Table 9). While 323 judges (58.2 percent) reported no matters under advisement over 60 days, 232 judges (41.8 percent) reported matters under advisement.

[1] Included in total.
[2] Does not include Senior Judges.

The 232 judges having matters held under advisement reported a total of 1,520 cases and motions held under advisement over 60 days on March 31, 1982. Of these, 1,011 cases and motions (66.5 percent) were held under advisement over 60 days but not more than six months; 356 cases and motions (23.4 percent) were held under advisement over six months but not more than one year; and 153 cases and motions (10.1 percent) were held over one year. The district judges of the Seventh Circuit reported the largest number of matters under advisement with a total of 376 matters.

Table 10 provides the distribution by circuit of cases and motions held under advisement over 60 days in the U.S. district courts on March 31, 1982.

U.S. BANKRUPTCY COURTS

Summary of Workload

During the twelve month period ended March 31, 1982, a total of 523,750 bankruptcy estates were filed in the U.S. bankruptcy courts, up 3.3 percent over the 506,831 estates filed in 1981. Bankruptcy estate terminations increased dramatically, rising 40.5 percent from 286,916 estates in 1981 to 403,003 estates in 1982. Despite the increase in dispositions , the number of bankruptcy estates pending reached 697,460 as of March 31, 1982. This is 20.9 percent above the 576,713 estates pending a year ago and represents an all-time high pending caseload. A summary of the bankruptcy caseload during the twelve month periods ended March 31, 1981 and 1982 is provided in Table 11. Additional data on the bankruptcy caseload is provided in Appendix Tables F-1, F-2A, F-2B, F-3A, F-3B, F-3C, and F-3D.

Bankruptcy Filings - Twelve Month Period

The 3.3 percent rate of increase in bankruptcy estate filings this year is down significantly from the 59.2 percent rate of a year ago. The 523,750 estates filed include 364,417 Code cases (158,776 of which are joint petitions) and 557 Act cases. (The Bankruptcy Act cases were originally filed under the Bankruptcy Act prior to October 1, 1979 and were re-opened during the year.) The most significant increase was in Puerto Rico (up 76.9 percent). Other districts experiencing large increases include Pennsylvania, Western (up 49.5 percent); Virgin Islands (up 42.1 percent); South Carolina (up 40.6 percent); and Texas, Eastern (up 37.9 percent). Table 12 is a comparison, by district, of bankruptcy estates filed during the twelve month periods ended March 31, 1981 and 1982.

Bankruptcy Filings - Three Month Period

In the three month period January through March 1982, the number of estates commenced experienced a slight increase compared to the same quarter in 1981. There were 131,059 estates commenced during the three month period in 1982 compared to 130,545 estates in 1981. Table 13 provides a comparison of bankruptcy estates commenced for statistical years 1975 through 1981 and for the first three quarters of 1982.

1980	91.7	66.9	35.2	10.1	43.8
1975	135.9	103.1	92.0	91.8	104.0

Bankruptcy Terminations

Bankruptcy estate terminations rose 40.5 percent in 1982, compared to an increase of 55.7 percent a year ago. The termination total of 403,003 estates is comprised of 257,334 Code cases (including 107,804 joint petitions) and 37,865 Act cases. Almost one-third of the growth in terminations is the result of significant increases in estate terminations in the following five districts: California, Central (up 18,837 estates); Illinois, Northern (up 5,213 estates); Ohio, Northern (up 4,989 estates); Ohio, Southern (up 4,726 estates); and California, Northern, (up 4,252 estates).

Bankruptcy Estates Pending

The pending bankruptcy caseload rose to 697,460 estates as of March 31, 1982, an increase of 20.9 percent over 1981. The rate of increase is down from the 48.9 percent rate of a year ago. This pending caseload is comprised of 437,599 Code cases (194,559 joint petitions) and 65,302 Act cases. The pending caseload increased by 120,747 estates over the 576,713 estates pending a year ago. The most significant increases were in Texas, Eastern (up 108.8 percent); Oklahoma, Eastern (up 104.5 percent); and Idaho (up 101.5 percent). Seven districts were able to reduce the number of pending estates from a year ago: Georgia, Middle; Kentucky, Western; New York, Eastern; Oklahoma, Northern; Oklahoma, Western; Virgin Islands; and Illinois, Central.

Adversary Proceedings

During the twelve month period ended March 31, 1982, a total of 127,118 adversary proceedings, arising out of Bankruptcy Code cases, were filed in the U.S. bankruptcy courts. This represents an increase of 53.9 percent over the 82,598 proceedings filed during the same period a year ago. During 1982, a total of 85,471 such proceedings were terminated. The number of proceedings pending rose to an all-time high 91,007 as of March 31, 1982. Data on the number of adversary proceedings filed, terminated, and pending during the twelve month period ended March 31, 1982 are provided in Appendix Table F-1AP.

FEDERAL PROBATION SYSTEM

During the twelve month period ended March 31, 1982, the number of persons received for new or reinstated terms of supervision totaled 37,680. The number of persons removed from supervision during the same period was 39,806. At the close of the period, there were 58,168 persons under active supervision. More detailed data on persons received and removed from supervision are provided in Appendix Table E-1.

Excluding transfers, the number of persons received during the twelve month period ended March 31, 1982 was 30,509 and the number of persons removed was 32,641. (See Table 14.) The difference is attributable to more persons being removed than were received on terms following institutional release. In contrast, the number of persons received from courts on probation and pretrial diversion (20,862) was nearly equal to the number removed from court supervision (20,972).

Table 14
Federal Probation System
Persons Received For and Removed from Supervision
During the Twelve Month Period Ended March 31, 1982

Type of Supervision	Persons Received	Persons Removed	Under Supervision Mar. 31, 1982	
			Number	Percent
Total	37,680	39,606	58,168	100.0
Total, less Transfers	30,509	32,641	-	-
District Courts	20,862	20,972	41,296	71.0
Court Probation	12,801	13,450	31,608	54.3
U.S. Magistrate Probation	6,089	5,510	7,598	13.1
Pretrial Diversion	1,972	2,012	2,090	3.6
From Institutions	9,647	11,669	16,872	29.0
Parole	5,907	7,560	12,384	21.3
Mandatory Release	1,863	1,986	1,164	2.0
Military Parole	303	292	414	0.7
Special Parole	1,574	1,831	2,910	5.0

Of the 58,168 persons actively supervised at the close of this period, 41,296 persons (71.0 percent) were under supervision from the courts and the remaining 16,872 persons (29.0 percent) were being supervised after release from Federal institutions. There were 31,608 (54.3 percent) probationers serving terms imposed by district court judges; 7,598 (13.1 percent) serving probation terms imposed by U.S. magistrates; and 12,384 (21.3 percent) serving regular parole terms. An additional 2,910 (5.0 percent) were serving special parole terms required by the Drug Abuse Prevention and Control Act of 1970 (DAPCA) for drug convictions. Persons serving under conditions of pretrial diversion (3.6 percent), and those on mandatory release (2.0 percent) and military parole (0.7 percent) accounted for the remainder.

Appendix Table E-2 provides the number of persons under each type of supervision at the close of the period in each district. Table 15 provides the number received on each type of supervision during the nine month period June 1981 through March 1982.

U.S. COURTS OF APPEALS

Summary of Workload

During the twelve month period ended September 30, 1982, the number of appeals filed and terminated in the U.S. courts of appeals increased from the previous year. A total of 27,768 appeals were filed in the 12 circuit courts during 1982, a rise of 2.5 percent from the 27,101 appeals filed in 1981. Appellate terminations increased 8.3 percent during the past twelve months, up from 25,990 appeals in 1981 to 28,159 appeals in 1982. During the year, the number of terminations outnumbered filings by 391 appeals. This caused the pending appellate caseload to decline 1.8 percent, from 22,165 cases in 1981 to 21,774 cases in 1982. Table 1 is a comparison, by circuit, of the appellate workload during the twelve month periods ended September 30, 1981 and 1982. Appendix Table B-1 provides more detailed data on the appellate workload in 1982.

Table 1
U.S. Courts of Appeals
Appeals Commenced, Terminated, and Pending
During the Twelve Month Periods Ended September 30, 1981 and 1982

Filings

During the twelve month period ended September 30, 1982, the total number of appeals filed in the U.S. courts of appeals rose 2.5 percent to 27,768 cases. In the past year, 9 of the 12 circuit courts registered increases in their filing activity. The largest increases in new filings were reported in the Eighth Circuit (up 15.5 percent); the First Circuit (up 13.6 percent); and the Tenth Circuit (up 10.7 percent). Three circuit courts (the Second, Fourth, and Ninth) experienced decreases in appellate filings during 1982. Of these courts, the greatest decline occurred in the Second Circuit, where new filings dropped 10.6 percent from the previous year. All categories of appeals decreased in the Second Circuit during this period with U.S. prisoner appeals showing the largest drop of 34.1 percent.

Among the various types of appeals nationwide, the most significant increase was in criminal appeals, up 12.4 percent, from 4,355 in 1981 to 4,897 in 1982. Four types of appeals reflected decreases in filing activity during the year. The greatest drop occurred in administrative agency appeals, down a sizable 18.1 percent to 3,060 cases. Modest declines in filing activity were recorded in U.S. prisoner appeals (down 3.1 percent); original proceedings (down 2.2 percent); and private prisoner appeals (down 1.1 percent).

Table 2 is a comparison of appeals commenced, by quarter, during each of the twelve month periods ended June 30, 1977 through 1982 and the first quarter of 1983. The 6,829 appeals filed during the period July through September 1982 were 2.5 percent lower than the 7,007 appeals filed during the same period last year. This quarterly decline represents the first decrease in a July through September period since 1977, when appellate filings dropped a slight 0.6 percent.

1977	44.4	44.0	36.5	60.3	46.2

Terminations

During the past twelve months, 9 of the 12 courts of appeals reported increases in their termination activity. This growth resulted in an 8.3 percent rise in total appellate terminations for 1982. The largest growth was in the Tenth Circuit, where case dispositions increased 44.0 percent over last year. Part of this circuit's growth can be attributed to two large groups of criminal appeals which arose from the District Court of Colorado. Each group of appeals was consolidated in the Tenth Circuit for the purposes of oral argument and final disposition. Other courts with significant increases in their case dispositions were the Third Circuit (up 31.9 percent); the Sixth Circuit (up 22.9 percent); the First Circuit (up 22.2 percent); the Eighth Circuit (up 22.2 percent); and the Fourth Circuit (up 20.1 percent). In 1982, three courts experienced decreases in their total termination activity. These courts were the Second Circuit (down 13.6 percent); the Ninth Circuit (down 5.3 percent); and the District of Columbia Circuit (down 0.5 percent).

Pending Caseload

As noted above, more appeals were terminated than were docketed in the U.S. courts of appeals, causing the pending appellate caseload to drop 1.8 percent. Seven of the twelve courts of appeals were able to reduce the number of cases pending on their dockets during the year. The most substantial decreases in pending cases were reported in the Third Circuit (down 11.0 percent) and the Tenth Circuit (down 10.2 percent). Declines for the remaining five circuits with reduced caseloads ranged from 4.1 to 8.1 percent. Of the five courts with increased pending caseloads, the most significant growth was reported in the Eleventh and Second Circuits, up 20.1 percent and 15.8 percent, respectively.

CASES UNDER SUBMISSION

Compared to a year ago, the overall number of cases under submission has increased slightly. The U.S. courts of appeals, Court of Claims, and Court of Customs and Patent Appeals reported 765 cases held under submission more than three months on September 30, 1982, as provided in Table 3. This was a 0.5 percent increase compared to the 761 cases reported in September 1981. A total of 444 cases (58.0 percent) were held more than three but less than six months; 180 cases (23.5 percent) were held more than six but less than nine months; 83 cases (10.8 percent) were held more than nine months but less than one year; and 58 cases (7.6 percent) were held more than one year. The Ninth Circuit reported 217 cases, 28.4 percent of the total cases under submission. Cases awaiting the submission of additional memoranda or awaiting an opinion in another case are not included in the totals.

The Fifth Judicial Circuit was divided into two circuits, the Fifth and the Eleventh, on October 1, 1981. Cases taken under submission prior to that time are listed under the former Fifth Circuit in the accompanying table. In some cases, the panels were made up of judges who are now in either the reorganized Fifth or Eleventh Circuits. Several cases under submission were heard en banc in the former Fifth Circuit.

CIVIL WORKLOAD

Summary of Workload

During the twelve month period ended September 30, 1982, a total of 212,559 civil cases were commenced in the U.S. district courts. This figure represents an increase of 14.5 percent over the 185,626 cases filed during the same period one year ago. The number of cases terminated also rose during the 1982 period, up 8.5 percent, from 180,772 in 1981 to 196,120 cases in 1982. Although there was a significant rise in dispositions, the pending civil caseload continued to increase, jumping from 195,525 in 1981 to an all-time high of 211,964 in 1982. Table 4 provides a comparison, by district, of the civil caseload during each of the twelve month periods ended September 30, 1981 and 1982. Additional data on civil activity in the U.S. district courts is provided in Appendix Tables C-1, C-2, C-3, C-3A, C-6A, and C-6B.

Civil Filings - Twelve Month Period

The 212,559 civil cases filed during the twelve month period ended September 30, 1982, continued the trend of steady increases in the civil workload. The 14.5 percent rate of increase is significantly higher than the 8.3 percent rate of increase recorded last year. The most notable increase in any category of civil filings occurred in recovery of overpayments and enforcement of judgment cases, up 54.2 percent, from 20,673 in 1981 to 31,869 in 1982. The steady rise in the number of recovery cases can be attributed to the Federal Government's increasing efforts to recover defaulted student loans and overpayments of veteran's benefits.

There were 82 districts that experienced increases in filings over 1981. Substantial percentage increases occurred in Minnesota (up 90.3 percent); Guam (up 88.9 percent); and Oklahoma, Northern (up 88.5 percent). The increases in Minnesota and Oklahoma, Northern are largely the result of recovery of overpayments and enforcement of judgment cases, while the increase in Guam is the result of a rise in land condemnation cases. Although most districts experienced an increase in filings, 12 districts, other than the Canal Zone (the court was phased out in March 1982), experienced declines in filings during the twelve month period ended September 30, 1982.

The largest reductions were reported in Virginia, Eastern (down 17.6 percent); Maine (down 17.4 percent); and the Virgin Islands (down 17.0 percent). Decreases in the number of recovery of overpayments and enforcement of judgment cases in Virginia, Eastern; personal injury product liability cases in Maine; and personal injury cases in the Virgin Islands are largely responsible for these declines.

Civil Filings - Three Month Period

A comparison, by quarter, of civil cases filed during each of the twelve month periods ended June 30, 1977 through 1982, and the first quarter of 1983, is provided in Table 5. The 56,793 civil cases filed during the three month period (July through September 1982) is 12.6 percent higher than the 50,427 cases filed during the same period last year, but is down slightly from the 57,220 cases filed during the previous quarter.

Percent Change 1982 over 1981	11.1	11.4	17.0	16.9	14.2

Civil Terminations

During the twelve month period ended September 30, 1982, the U.S. district courts disposed of 196,120 civil cases, 15,348 more than the 180,772 disposed of a year ago. Among the 78 districts reporting increases in disposition activity, the most notable were Minnesota (up 84.7 percent); Wisconsin, Western (up 82.4 percent); and North Carolina, Middle (up 75.2 percent). The increases in the termination caseloads in these districts are the result of dispositions of recovery of overpayments and enforcement of judgment cases in Minnesota and North Carolina, Middle, and prisoner civil rights cases in Wisconsin, Western. Other districts experiencing large increases in disposition activity were South Dakota (up 55.7 percent); Oklahoma, Northern (up 51.6 percent); and New York, Northern (up 51.3 percent). Other than in the Canal Zone, the largest reductions in civil terminations were in Massachusetts (down 40.9 percent); West Virginia, Southern (down 25.0 percent); Alaska (down 17.1 percent); and New York, Western (down 17.0 percent).

Civil Pending Caseload

The civil pending caseload increased at a rate of 8.4 percent, from 195,525 cases in 1981 to 211,964 cases during the twelve month period ended September 30, 1982. The current rate of increase in the pending caseload reverses a downward trend since 1979, when the rate of increase reached 8.1 percent. After 1979, the rate of increase dropped to 3.9 percent in 1980 and to 2.5 percent in 1981.

Despite the overall increase in the number of civil cases pending in the U.S. district courts during 1982, 15 districts were able to reduce their caseloads. Among those districts experiencing declines (other than the Canal Zone), the most significant were Florida, Southern (down 26.1 percent); South Dakota (down 19.2 percent); and Maine (down 17.3 percent). Other substantial declines occurred in Wisconsin, Western; Michigan, Western; and Kentucky, Eastern; down 16.7 percent, 16.4 percent, and 16.1 percent, respectively. The largest increases in pending caseloads were reported by Georgia, Middle (up 51.0 percent) and Utah (up 35.4 percent).

Civil Cases Pending Three Years or More

In March 1981, the Judicial Conference adopted a resolution requiring judges to annually review their dockets and report the status of all cases pending three years or more. This resolution, together with the adoption of other resolutions in September 1961 and March 1963, expresses the concern of the Judicial Conference regarding efforts to reduce the number of civil cases pending three years or more.

As of June 30, 1982, a total of 13,979 civil cases had been pending three years or more. As of September 30, 1982, this number increased to 14,455 cases. The 14,455 cases pending three years or more is expected to decline as judges continue to direct more attention to the disposition of these matters. The districts with the smallest number of three-year-old cases are Tennessee, Eastern and the Northern Mariana Islands with two each. A comparison, by district, of the number of civil cases pending three years or more (excluding land condemnation) as of June 30, 1982 and September 30, 1982 is provided in Table 6.

Table 6

CRIMINAL WORKLOAD

Summary of Workload

During the twelve month period ended September 30, 1982, the number of criminal cases filed in U.S. district courts increased by 5.8 percent from 31,280 last year to 33,097 this year. Case terminations rose by 7.3 percent, with 31,877 cases terminated this year compared to 29,705 in 1981. There were 1,220 more cases filed than terminated during the year, resulting in an increase in the pending caseload at the end of the year. The 17,671 cases pending on September 30, 1982 represented a 7.4 percent increase over the 16,451 cases pending on the same day a year ago. Table 7 compares the number of criminal cases and defendants for the twelve month periods ended September 31, 1981 and 1982. The number of cases filed, terminated, and pending during the year is provided by district in Appendix Table D-1.

Table 7
U.S. District Courts
Criminal Cases and Defendants (Including Transfers)
During the Twelve Month Periods Ended September 30, 1981 and 1982

Terminations	29,705	31,877	7.3	40,400	43,572	7.9
Pending September 30	16,451*	17,671	7.4	23,665	25,241	6.7

* Revised

During the three month period from July 1, 1982 through September 30, 1982, there were 8,695 criminal cases filed. This was a 6.0 percent increase over the 8,204 cases filed in the same three months last year. There were 7,680 cases terminated during the quarter, almost the same number as last year when there were 7,677 cases terminated for the quarter.

Criminal Cases by Offense Level and Type of Proceeding

There were 31,995 cases filed, excluding transfers, during the twelve month period ended September 30, 1982. During the year there were 21,861 felony cases filed; 9,572 misdemeanors other than petty offenses; and 562 petty offense filings. The number of cases filed by type of proceeding is provided in Appendix Table D-2. Table 8 provides this information for felony cases only for the twelve month periods ended September 30, 1981 and 1982. The 21,861 felony cases, excluding transfers, filed in the courts during 1982 represented an increase of 6.1 percent over the 20,600 felony cases filed in 1981. The number of felony cases commenced by indictment increased by 4.8 percent from 17,240 cases last year to 18,071 the this year. Indictment is the most common method by which cases are commenced in the district courts and this type of proceeding accounted for 82.7 percent of all felony cases and for 56.5 percent of all criminal cases filed during the year. Felony cases filed by an information when the indictment was waived by the defendant increased by 83.5 percent, from 479 case filings last year to 879 this year.

Note: Percent change computed on 25 or more.

Criminal Filings by Major Offense

Case filings increased in most offense categories this year, contributing to the overall rise in filings. The largest increase occurred in forgery and counterfeiting cases which rose by 28.6 percent from 1,764 cases in 1981 to 2,269 in 1982. Prosecutions for auto theft increased by 20.8 percent from 308 cases to 372 cases.

Prosecutions under the Drug Abuse Prevention and Control Act (DAPCA) increased by 14.8 percent, up to 4,329 cases in 1982 compared to 3,771 in 1981. Under DAPCA, case filings for marihuana violations rose by 39.2 percent from 1,257 cases to 1,750 cases. Appendix Table D-2 provides case filings by offense categories. Case filings by district and offense are provided in Appendix Table D-3.

Criminal Pending Caseload

There were 17,671 cases pending on September 30, 1982 compared to 16,451 cases pending last year, an increase of 7.4 percent. Table 9 provides the number of cases pending in each of the district courts as of September 30, 1981 and 1982. Sixty districts showed increases in the pending caseloads this year, while 35 districts had decreases in pending cases.

The largest percentage increases occurred in Louisiana, Western; West Virginia, Northern; Guam; and Illinois, Central. Each of these districts had more than a 100.0 percent increase in pending cases. Following these districts were Missouri, Eastern (87.7 percent); Nevada (84.9 percent); Louisiana, Eastern (69.2 percent); Washington, Eastern (67.6 percent); and New York, Western (58.8 percent).

CASES AND MOTIONS UNDER ADVISEMENT

For the third quarter of 1982, U.S. district judges reported 1,297 matters held under advisement over 60 days, a 10.0 percent increase over the 1,179 matters reported last year. Some of this increase is attributable to the number of judges who reported this quarter. There were 514 district judges, including 121 senior judges, who reported on the status of matters before the court, compared to 462 district judges for the same quarter last year (see Table 10). While 317 judges (61.7 percent) reported no matters under advisement over 60 days, 197 judges (38.3 percent) reported matters under advisement on September 30, 1982.

[1] Included in total.
[2] Does not include Senior Judges.

The 197 judges having matters held under advisement reported a total of 1,297 cases and motions held under advisement over 60 days on September 30, 1982. Of these, 869 cases and motions (67.0 percent) were held under advisement over 60 days but not more than six months; 289 cases and motions (22.3 percent) were held under advisement over six months but not more than one year; and 139 cases and motions (10.7 percent) were held over one year. The district judges of the Seventh Circuit reported the largest number of matters under advisement with a total of 295 matters or 22.7 percent, while district judges in the District of Columbia Circuit reported only 6 cases or 0.5 percent of all matters reported.

Table 11 provides the distribution by circuit of cases and motions held under advisement over 60 days in the U.S. district courts on September 30, 1982.

Summary of Workload

During the twelve month period ended September 30, 1982, bankruptcy estate filings rose slightly to 536,419 or 2.7 percent higher than the 522,486 filed last year. Bankruptcy estate terminations increased substantially, up 21.8 percent from 357,036 in 1981 to 434,932 in 1982. The pending bankruptcy caseload continued to increase, rising to 756,553 estates as of September 30, 1982, 15.5 percent above the 655,066 pending a year ago. A summary of the bankruptcy caseload during the twelve month periods ended September 30, 1981 and 1982 is provided in Table 12. Additional data on the bankruptcy caseload during the twelve month period ended September 30, 1982, is provided in Appendix Tables F-1, F-2A, F-2B, F-3A, F-3B, F-3C, and F-3D.

Percent Change 1982 over 1981	2.7	21.8	15.5

Bankruptcy Filings

The 536,419 estates filed in the U.S. bankruptcy courts in 1982 are up slightly from the number filed during the same period in 1981, and 27.3 percent higher than in 1980. The 1982 estate figure includes 373,853 cases filed pursuant to the Bankruptcy Reform Act of 1978, Public Law 95-598 (referred to as Code cases). Of these 373,853 Code cases, 162,168 are joint petitions. The remaining 398 cases are estates originally filed prior to implementation of the Reform Act and reopened during this period and are referred to as Act cases. The Sixth, Seventh, and Ninth Circuits had the greatest concentration of bankruptcy filing activity. These three circuits accounted for 52.4 percent of all estates filed in 1982. Table 14 shows the filing activity in each district for bankruptcy cases and joint petitions during the twelve month periods ended September 30, 1981 and 1982.

Bankruptcy Filings - Three Month Period

During the three month period July through September 1982, a total of 139,144 estates were commenced, a 6.6 percent increase over the 130,536 filed during the same period a year ago. The 139,144 estates filed during this quarter is the highest number of bankruptcy estates ever filed during a comparable period. Table 13 provides a comparison of bankruptcy estates filed, by quarter, for statistical years 1975 through 1982 and for the first quarter of 1983.

Bankruptcy Terminations

Bankruptcy estate terminations continued to climb during the twelve month period ended September 30, 1982, reaching an all-time high of 434,932, up 77,896 from the 357,036 estates in 1981. The estate termination figure is comprised of 285,651 Bankruptcy Code cases (121,005 joint petitions) and 28,276 Act cases. Table 15 indicates the extent of the increase in termination activity in the six largest districts.

Table 15
U.S. Bankruptcy Courts
Bankruptcy Estates Terminated in the Six Largest Districts
During the Twelve Month Periods Ended
September 30, 1981 and 1982

District	Estates Terminated		Percent Increase
	1981	1982	
Total	39,669	85,493	115.5
California, Central	19,865	38,844	95.5
Indiana, Southern	8,403	16,088	91.5
California, Eastern	4,910	13,395	172.8
Pennsylvania, Western	2,431	6,297	159.0
Maryland	2,441	5,554	127.5
North Carolina, Eastern	1,619	5,315	228.3

Bankruptcy Estates Pending

Despite the significant increase in termination activity, the pending caseload in the U.S. bankruptcy courts continued to rise, reaching a high of 756,553 estates as of September 30, 1982. The rate of increase, however, dropped significantly from 33.7 percent in 1981 to 15.5 percent in 1982. The current pending caseload is comprised of 481,970 Code cases (214,454 joint petitions) and 60,129 Act cases.

Adversary Proceedings

During the twelve month period ended September 30, 1982, a total of 149,264 adversary proceedings were filed in the U.S. bankruptcy courts, up a substantial 39.8 percent from the 106,764 filed in 1981. Adversary proceeding terminations also jumped significantly, rising 44.5 percent from 69,180 in 1981 to 99,933 in 1982. Despite the increased termination activity, the number of pending adversary proceedings rose to 117,146, an increase of 72.7 percent from the 67,815 proceedings pending a year ago. Table 14 provides a comparison of adversary proceedings filed, in 1981 and 1982, by district. Appendix Table F-1AP also provides a summary of adversary proceeding activity, by district, during the twelve month period ended September 30, 1982.

FEDERAL PROBATION SYSTEM

As of September 30, 1982, the number of persons under supervision in the Federal Probation System had risen to 59,009 from 58,494 reported on the same date last year. This increase, although relatively small, was in sharp contrast to the decrease of 4,867 reported in 1981. The turnaround resulted from an increase of 2,856 in the number of persons received for supervision in 1982, with the total reaching 32,048 (excluding transfers). In addition, the number of removals from supervision declined nearly 1,000 this year to 31,775 (excluding transfers), down from 32,707 removed last year. Appendix Table E-1 displays the number of persons received for and removed from supervision during the twelve month period ended September 30, 1982, by district.

Persons Received for Supervision Increases 9.8 Percent

The 32,048 persons received on new or reinstated periods of supervision in 1982 was 9.8 percent more than were received last year. This increase reversed a decline of 1,678 that was recorded last year (see technical note). As shown in Table 16, the number of persons received from district courts this year was 3,046 or 15.8 percent higher than last year, the second successive increase following several years of declines. The number of court probationers received was up 14.8 percent while the number received for probation supervision imposed by U.S. magistrates increased by 21.5 percent. A smaller rise of 114 or 5.8 percent was reported in the number of persons received this year under conditions of pretrial diversion.

Table 16
Persons Received for Supervision in the Federal Probation System
During the Twelve Month Periods Ended September 30, 1980 through 1982
(Excludes Transfers)

Type of Supervision	1980	1981	1982	Increase or Decrease	Percent Change 1982/1981
Total	30,870	29,192	32,048	2,856	9.8
From District Courts	18,577	19,338	22,384	3,046	15.8
Court Probation	11,914	11,920	13,681	1,761	14.8

From Institutions	12,293	9,854	9,664	-190	-1.9
Parole	7,567	6,203	5,787	-416	-6.7
Mandatory Release	2,490	1,839	2,005	166	9.0
Special Parole	1,948	1,486	1,608	122	8.2
Military Parole	288	326	264	-62	-19.0

TECHNICAL NOTE

In the past, records received during the year reporting supervision periods that actually commenced during a prior year have been added to the number of persons under supervision at the beginning of the year. This year, a change was made to add late-arriving records to the total of persons received. This change accounted for part of the increase in persons received.

In contrast, 190 (1.9 percent) fewer persons were received from institutions this year, but this decline was modest when compared to the drop of more than 2,400 persons reported in 1981. A decrease of 6.7 percent in the number of persons received on parole offset increases of 9.0 percent and 8.2 percent in the number of persons received on mandatory release and special parole terms, respectively.

A comparison of the total received for supervision for the three month periods July through September 1981 and 1982 is provided in Table 17. The total number of persons received during the three month period this year was 8.1 percent above the number recorded during the same period in 1981. The increase in special parolees noted over the full year does not appear in the three month comparison indicating that perhaps the increasing trend in this area has slowed somewhat. The increase in persons received on pretrial diversion was more pronounced during the three month period, as was the decrease in military parolees received. Changes shown in the three month comparison for the other types of supervision paralleled the changes shown in the twelve month analysis of persons received.

Table 17
Persons Received for Supervision
(Excludes Transfers)
Three Month Periods July through September 1981 and 1982

Type of Supervision	1981	1982	Percent Change
Total	7,383	7,980	8.1
From District Courts	4,868	5,555	14.1
Court Probation	2,989	3,427	14.7
U.S. Magistrate Probation	1,393	1,570	12.7
Pretrial Diversion	486	558	14.8
From Institutions	2,515	2,425	-3.6
Parole	1,530	1,428	-6.7
Mandatory Release	476	521	9.5
Special Parole	423	422	-0.2
Military Parole	86	54	-37.2

Persons Removed from Supervision

The number of persons removed to inactive status or terminated from supervision (excluding transfers) fell to 31,775 in 1982. This was 932 fewer removals than last year and 2,182 below the total removed two years ago.

The 12,880 court probationers removed from supervision this year was a decrease of 678 from last year's total. There were also 517 fewer parolees removed in 1982, down from 7,605 to 7,088, and 401 fewer special parolees removed.

The number of probationers removed from supervision imposed by U.S. magistrates rose to 5,723 this year from 5,082 last year. This increase, which was the only one of any significance in persons removed from supervision, resulted from the rising number of persons under supervision during the past 18 months on these relatively shorter terms.

Persons Under Supervision

As shown in Table 18, there were 59,009 persons under supervision on September 30, 1982. This was a slight increase of 0.9 percent above the total reported at the end of last year. Persons supervised by the courts increased by 1,965 (4.8 percent) to 42,689, while the number of institutional releasees under supervision declined by 1,450 (8.2 percent) to 16,320.

Table 18
Persons Under Supervision
On September 30, 1981 and 1982

Type of Supervision	1981	1982	Increase or Decrease	Percent Change
Total	58,494	59,009	515	0.9
From District Courts	40,724	42,689	1,965	4.8
Court Probation	31,564	32,471	907	2.9
U.S. Magistrate Probation	7,096	8,043	947	13.3
Pretrial Diversion	2,064	2,175	111	5.4
From Institutions	17,770	16,320	-1,450	-8.2
Parole	13,066	11,825	-1,241	-9.5
Mandatory Release	1,221	1,147	-74	-6.1
Special Parole	3,042	2,953	-89	-2.9
Military Parole	441	395	-46	-10.4

At the close of the year, there were 947 more probationers serving terms imposed by U.S. magistrates and 907 more probationers serving court-imposed terms. These increases were countered by a substantial decline of 1,241 in the number of parolees supervised at the close of the period. Small declines were also reported in persons serving special parole terms (down 89); mandatory release (down 74); and military parole (down 46).

Changes in District Caseloads

During the twelve month period ended September 30, 1982, 55 districts experienced increases in their caseloads. Maryland reported a gain of 304 persons under supervision; New York, Southern increased its caseload by 137 persons; and Georgia, Northern's caseload grew by 131 persons. North Carolina, Western had 133 more persons under supervision when the year ended, partly as a result of a re-alignment in which they gained four counties from the Middle District of North Carolina (P.L. 96-462, effective 10-1-81). California, Southern and Florida, Southern also reported increases in their caseloads during 1982 of 110 and 104 persons, respectively.

Although only 39 districts showed reductions in their caseloads this year compared to 71 last year, five districts reported declines of more than 100 persons. The District of Columbia had 167 fewer persons under supervision and Michigan, Eastern was down 161 persons when the period closed. New York, Eastern registered a decrease of 105 persons under supervision, while Pennsylvania, Western reported 101 fewer persons under supervision on September 30, 1982. Finally, the 138 persons shown under supervision in the Canal Zone last year are not shown this year because the probation office closed on March 31, 1982 in accordance with the Panama Canal Treaty.

Table 19 provides data on persons under supervision by district on September 30, 1981 and 1982. Appendix Table E-2 provides the number of persons under each type of supervision by district as of September 30, 1982.

** These figures do not accurately reflect the true reversal rate in this court of appeals. During the year, cases which were both reversed and remanded in the First Circuit were reported as remands. In other courts of appeals, similar situations were reported as reversals. This practice resulted in artificially low reversal rates for the First Circuit.

* PERCENT NOT SHOWN WHERE THE TOTAL NUMBER OF CASES DISPOSED OF AFTER HEARING OR SUBMISSION IS LESS THAN 10. NO PERCENTAGES OF CASES REVERSED OR DENIED HAS BEEN COMPUTED FOR ORIGINAL PROCEEDINGS BECAUSE OF THEIR DIFFERENCE FROM APPEALS. NOR HAVE THEY BEEN INCLUDED IN THE PERCENTAGE OF TOTAL APPEALS REVERSED.

U.S. COURTS OF APPEALS

FEDERAL CIRCUIT

Summary of Workload

Effective October 1, 1982, the Federal Courts Improvement Act of 1982 (Public Law 97-164) established a new appellate court called the U.S. Court of Appeals for the Federal Circuit headquartered in Washington, DC. This court was created by joining the appellate division of the U.S. Court of Claims with the U.S. Court of Customs and Patent Appeals. The court has retained the jurisdiction of both predecessor courts. Additionally, it has jurisdiction over final decisions of the U.S. district courts in patent infringement actions and final orders and decisions of the Merit Systems Protection Board and the various agency boards of contract appeals. The first statistics on this new court's workload during the three month period ended December 31, 1982 appear in Table 1.

The Act also created the U.S. Claims Court, a new Article I trial forum with substantially the same trial jurisdiction as the former U.S. Court of Claims. (Statistics for the U.S. Claims Court will continue to be published once a year in the **Annual Report of the Director**.)

During the three month period ended December 31, 1982, a total of 140 appeals were filed in the newly formed Federal Circuit. Of these, the largest number, 51, arose from the Patent and Trademark Office. The number of case terminations recorded this quarter was 112, with the greatest number (78) involving appeals arising from the U.S. Claims Court.

A total of 23 appeals were withdrawn prior to decision. Of the 89 appeals decided by the court, 85.4 percent were affirmed, 6.7 percent were reversed, and 7.9 percent were modified. As of December 31, 1982, a total of 291 cases were pending on the Federal Circuit's general docket.

TWELVE CIRCUIT COURTS OF APPEALS

Summary of Workload

During the twelve month period ended December 31, 1982, the number of cases filed in the U.S. courts of appeals grew to a record level. A total of 28,161 new appeals were docketed in the 12 circuit courts, a rise of 2.7 percent over the 27,432 appeals docketed in 1981. Case dispositions increased 5.2 percent during the calendar year, up from 26,757 appeals in 1981 to 28,151 appeals in 1982. Because of the increased termination activity during the year, the overall pending caseload in the U.S. courts of appeals grew by only ten appeals. A total of 22,149 appeals were pending on the dockets as of December 31, 1982, compared to the 22,139 appeals pending in 1981. Table 2 is a comparison, by circuit, of the appellate workload during the twelve month periods ended December 31, 1981 and 1982. Appendix Tables B-1 and B-3 provide more detailed data on the appellate workload in 1982.

Table 2

Eleventh	2,363	2,699	14.2	2,280	2,257	-1.0	2,198	2,640	20.1

Filings Rise 2.7 Percent

Eight of the twelve circuit courts reported increases in their docketing activity during the past twelve month period. The largest growth was reported in the Eleventh Circuit, up 14.2 percent to 2,699 appeals. Substantial increases in case filings were also recorded in the District of Columbia Circuit (up 9.2 percent); the First Circuit (up 8.4 percent); and the Third Circuit (up 7.3 percent). Four circuit courts (Second, Fourth, Seventh, and Ninth) experienced decreases in their case filings during the year. The most significant decline occurred in the Fourth Circuit, where new filings dropped 7.4 percent to 2,451 appeals. Most of the overall decrease in the Fourth Circuit can be attributed to the respective 22.5 percent and 20.0 percent drops in new administrative agency and private prisoner appeals during 1982.

Nationally, the largest increases among the various types of appeals were in bankruptcy and criminal appeals, up 11.1 percent and 9.1 percent, respectively. Civil appeals, which reported an 18.2 percent growth rate in 1981, rose a modest 3.8 percent during 1982. Filings decreased in two categories of appeals during the year. The greatest drop occurred in administrative agency appeals, down 12.3 percent to 3,038 cases. This total is the lowest recorded since 1979, when 2,965 agency appeals were filed in the circuit courts. A decline in filing activity was also noted in original proceedings, which declined 1.1 percent to 739 in 1982. While U.S. civil appeals as a whole increased (up 1.3 percent), U.S. prisoner appeals dropped 2.0 percent. Table 3 is a comparison of the types of appeals filed during the twelve month periods ended December 31, 1981 and 1982.

Table 3
U.S. Courts of Appeals
Source of Appeals Filed in the U.S. Courts of Appeals

Original Proceedings	747	739	-1.1

Table 4 is a comparison of appeals commenced, by quarter, during each of the twelve month periods ended June 30, 1977 through 1982 and the quarters ended September 30 and December 31, 1982. The 7,041 appeals filed during the period October through December 1982 was the highest number ever recorded during any October through December period. These appeals were 6.0 percent greater than the filings reported during October through December 1981 and 3.2 percent greater than the filings reported during the previous three months. For the six month period July through December 1982, a total of 13,864 appeals were filed in the 12 circuit courts. This figure represents a slight 1.6 percent increase over the same period last year.

Table 4
U.S. Courts of Appeals
Appeals Commenced by Quarter,
1977 through 1983

1981	11.8	5.2	1.6	5.7	6.0
1977	44.4	44.0	36.5	60.3	46.2

Terminations Increase 5.2 Percent

With 7 of the 12 circuit courts increasing their termination activity during the year, total appellate dispositions grew 5.2 percent over 1981. A good portion of this growth can be attributed to activity in the Third Circuit, where terminations increased 52.6 percent to 2,618 appeals. In 1982, the Third Circuit implemented a new procedure for processing stagnant appeals on the general docket. With the implementation of this new procedure, the Third Circuit was able to increase total dispositions by 902 appeals during the calendar year. Other circuit courts with substantial increases in termination activity were the Sixth Circuit (up 25.2 percent); the Tenth Circuit (up 22.7 percent); and the First Circuit (up 14.3 percent).

Terminations decreased in five circuit courts in 1982. The most significant drop occurred in the District of Columbia Circuit, down 8.2 percent from the previous year. In this circuit, the largest decline was in administrative agency appeals, dropping from 738 cases in 1981 to 653 cases in 1982. Other reductions in appellate terminations were reported in the Fifth Circuit (down 7.9 percent); the Second Circuit (down 5.7 percent); the Ninth Circuit (down 4.0 percent); and the Eleventh Circuit (down 1.0 percent).

Pending Caseload Remains Steady

Although the overall pending caseload grew slightly, half of the 12 circuit courts were able to reduce their caseloads during the year. The Third Circuit, which experienced the largest growth in pending caseload in 1981, reported the largest decline during 1982. The 15.5 percent drop in this circuit was mainly the result of a tremendous 52.6 percent increase in termination activity during the year. Declines for the remaining five circuits with reduced caseloads ranged from a high of 7.0 percent in the Ninth Circuit to a low of 1.3 percent in the First Circuit.

Of the six circuit courts with increases, the most significant growth in pending cases occurred in the Eleventh Circuit, up 20.1 percent. This rise was due to a 14.2 percent increase in new filings along with a 1.0 percent decrease in case terminations during the year. Other courts with substantial increases were the Eighth Circuit (up 12.0 percent); the Fifth Circuit (up 6.7 percent); and the Seventh Circuit (up 5.4 percent).

Cases Disposed of After Hearing or Submission

During the past twelve months, the U.S. courts of appeals terminated a total of 12,854 cases after oral hearing or submission on briefs. This number represents an increase of 4.2 percent over the 12,337 cases terminated in 1981. As a percent of the yearly dispositions, these appeals continued to decline for the third consecutive year to 45.7 percent of the total terminations. Cases terminated without oral hearing or submission on briefs rose 6.7 percent during the year, up from 10,430 appeals in 1981 to 11,124 appeals in 1982. The number of appeals disposed of by consolidation increased slightly from 3,990 cases in 1981 to 4,173 cases in 1982, a rise of 4.6 percent.

CASES UNDER SUBMISSION

The overall number of cases under submission for more than 90 days on December 31, 1982 was 22.9 percent above the 541 cases reported in December 1981. The U.S. courts of appeals, the Court of Appeals for the Federal Circuit, and the Temporary Emergency Court of Appeals reported 665 cases held under submission for the quarter ended December 31, 1982 as provided in Table 5. A total of 340 cases (51.1 percent) were held more than three but less than six months; 176 cases (26.5 percent) were held more than six but less than nine months; 80 cases (12.0 percent) were held more than nine months but less than one year; and 69 cases (10.4 percent) were held more than one year. The Ninth Circuit Court of Appeals reported 193 cases, 29.0 percent of the total cases under submission. Cases awaiting the submission of additional memoranda or awaiting an opinion in another case are not included in the totals.

The Fifth Judicial Circuit was reorganized into two circuits, the Fifth and the Eleventh, on October 1, 1981. Cases taken under submission prior to that time are listed under the Former Fifth Circuit in Table 5. In some cases, the panels include judges who are now in either the reorganized Fifth Circuit or the new Eleventh Circuit. Several cases under submission were heard en banc in the Former Fifth Circuit.

U.S. DISTRICT COURTS

CIVIL WORKLOAD

Summary of Workload

During the twelve month period ended December 31, 1982, the number of civil cases filed, terminated, and pending in the U.S. district courts continued to reach record totals. The number of civil cases filed reached 223,581 in 1982, an increase of 17.4 percent over the 190,428 cases filed one year ago. The number of civil cases terminated also increased, up 12.3 percent from 180,635 in 1981, to 202,766 in 1982. Despite the increased disposition rate, civil filings exceeded terminations by 20,815. This increase resulted in a 10.6 percent rise in the civil pending caseload, from 196,808 cases in 1981 to 217,623 cases in 1982. Table 7 is a comparison, by district, of the civil workload for the twelve month periods ended December 31, 1981 and 1982. More detailed information on civil cases filed, terminated, and pending is provided in Appendix Table C-1.

Summary of Six Month Civil Workload

During the six month period from July through December 1982, a total of 114,852 civil cases were filed. This figure represents an increase of 17.8 percent over the 97,464 civil cases filed during the same period a year ago. A record total of 58,059 cases were filed during the three month period October through December 1982, up 1,266 cases from the previous three month period. This represents a substantial increase of 23.4 percent over the number filed during this period in 1981. Table 6 provides data on the number of civil cases filed, by quarter, from July 1, 1977 through December 31, 1982.

Civil Filings Up 17.4 Percent Over 1981

The 223,581 civil cases filed during the twelve month period ended December 31, 1982 is indicative of the continual growth of civil cases in the district courts. There were 83 districts that experienced increases in filing activity during 1982. The largest increases were reported by Guam (up 110.7 percent); Minnesota (up 71.1 percent); and Indiana, Southern (up 56.9 percent). The substantial increase in filings in Guam is largely the result of claims by individuals pursuant to the Omnibus Territorials Act of 1977 for fair compensation for land taken by the Federal government in 1944 and 1963. The rise in filings in Minnesota and Indiana, Southern is the result of an influx of recovery of overpayment and enforcement of judgment cases, specifically, recovery of overpayments of veteran benefits and defaulted student loans.

Although there was a significant rise in the overall number of civil cases filed in 1982, several districts experienced declines in filing activity. Excluding the territorial courts (the District Court of the Canal Zone was phased out effective March 31, 1982), the most significant declines occurred in South Dakota (down 12.2 percent); Virginia, Eastern (down 12.1 percent); and North Dakota (down 10.1 percent). Additional data on the number and type of civil cases filed, by district, is provided in Appendix Table C-3.

Civil Filings by Basis of Jurisdiction

The overall increase in civil filings in 1982 is highlighted by a 30.9 percent increase in the number of civil cases filed by the Federal government. This high rate of increase is largely the result of the Federal government's attempt to recover defaulted student loans and overpayments of veterans' benefits. The rate of increase for U.S. defendant cases also rose sharply, up from 1.4 percent in 1981 to 21.1 percent in 1982. This increase in the number of civil actions filed against the U.S. is mostly the result of an increasing number of claims filed under Social Security laws. The substantial drop in the number of civil cases filed under local jurisdiction is the result of the abolishment of the territorial court in the Canal Zone. Table 8 provides a comparison of civil cases filed, by basis of jurisdiction, during the twelve month periods ended December 31, 1981 and 1982. Additional data on civil cases filed, by basis of jurisdiction, is provided in Appendix Table C-2.

Table 8
U.S. District Courts
Civil Filings by Basis of Jurisdiction
During the Twelve Month Period Ended December 30, 1981 and 1982

Jurisdiction	1981	1982	Percent Change
Total	190,428	223,581	17.4

Diversity of Citizenship	47,778	55,051	15.2
Local Jurisdiction	759	599	-21.1

Civil Filings by Nature of Suit

Civil litigation in the U.S. district courts during the twelve month period ended December 31, 1982 increased by 33,153 cases over 1981. Although many nature of suit categories experienced significant increases, the most dramatic rise occurred in Social Security filings. More specifically, claims filed for widows or widowers benefits based on disability under Title II of the Social Security Act rose from 6,275 cases in 1981 to 10,109 cases in 1982. Other categories of civil litigation showing large increases were recovery of overpayment of veterans' benefits (up 25,437 cases), defaulted student loans (up 3,304 cases), and employment civil rights cases (up 1,266 cases). Significant declines were noted in Fair Labor Standards Act cases, Occupational Safety and Health Act cases, and environmental matters. More detailed information on civil cases filed, by district and nature of suit, is provided in Appendix Table C-3.

Civil Terminations Increase 12.3 Percent

During the twelve month period ended December 31, 1982, the number of civil cases disposed of in the U.S. district courts increased 12.3 percent. This increase is significantly higher than the 5.7 percent increase in civil dispositions between 1980 and 1981. The overall increase in termination activity is the result of increases in 80 districts. Wisconsin, Western experienced the highest rate of increase in civil terminations, up 102.4 percent. This high rate is the result of the increased disposition of prisoner petitions and recovery of veterans' overpayment cases. Other districts experiencing large increases in termination activity were Minnesota (up 69.5 percent); Rhode Island (up 67.2 percent); and North Carolina, Middle (up 61.2 percent). Excluding the District Court of the Canal Zone, 14 districts experienced declines in terminations. The most notable declines occurred in West Virginia, Southern (down 37.8 percent); Hawaii (down 16.1 percent); and Florida, Southern (down 15.1 percent). A summary of civil cases terminated in 1982, by district and action taken, is provided in Appendix Table C-4A.

Significant increases occurred in civil termination activity for several nature of suit categories in 1982. For the second consecutive year, the number of recovery of overpayments and enforcement of judgments cases terminated involving the Federal government far outnumbered terminations in any other nature of suit category. A total of 32,422 such cases were terminated in 1982, up 58.6 percent from the 20,439 cases terminated in 1981. Notable increases in disposition activity among private cases occurred in diversity of citizenship contract actions (up 17.6 percent) and Federal question labor litigation cases (up 16.9 percent). The largest declines in U.S. cases were in Fair Labor Standards Act cases (down 13.8 percent) and negotiable instruments cases (down 9.6 percent). Additional data on civil cases terminated in 1982, by nature of suit and action taken, is provided in Appendix Table C-4.

Civil Pending Caseload Climbs 10.6 Percent

As of December 31, 1982, there were 217,623 civil cases pending in the U.S. district courts. This represents an increase of 20,815 cases over the 196,808 cases pending one year ago. The 10.6 percent increase is also the highest rate of increase in the civil pending caseload during any calendar year since 1976. Although there has been a steady growth of civil cases pending in the district courts, many districts were able to reduce their pending caseloads in 1982. The most substantial reductions, excluding the territorial courts, were in Wisconsin, Western (down 34.5 percent); South Dakota (down 25.7 percent); and Florida, Southern (down 17.9 percent). The largest increases were in Georgia, Middle (up 47.1 percent); Ohio, Southern (up 43.5 percent); and Ohio, Northern (up 40.4 percent).

The overall increase in the civil pending caseload is highlighted by notable increases in several case types. The largest increases were in Social Security cases (up 27.3 percent), U.S. contract cases (up 26.1 percent), and private real property cases (up 19.5 percent). There were substantial declines in cases pending involving the U.S.: antitrust cases declined 40.3 percent, prisoner mandamus cases declined 33.6 percent, and labor suits declined 20.2 percent. Appendix Table C-3A provides additional data on civil cases pending in 1982, by nature of suit and district.

Overall Decline in Civil Cases Pending Three Years or More

The total number of civil cases pending three years or more in the U.S. district courts has been steadily decreasing since 1979. Through the increasing efforts of the courts, the number of cases pending three years or more declined 4.2 percent, from 17,344 cases in 1981 to 16,614 cases as of December 31, 1982. The 16,614 cases represent the lowest total since 1977. Table 9 is a summary of civil cases pending, by age, as of December 31, 1973 through 1982.

During the six month period July through December 1982, the number of civil cases pending three years or more, excluding land condemnation, rose 5.9 percent as indicated in Table 10. Despite the overall increase, 27 districts were able to reduce their three-year-old cases over the past six months. The districts experiencing the largest decreases were South Carolina (down 35.1 percent); Wisconsin, Western (down 21.7 percent); and Texas, Southern and Arkansas, Western (each down 20.0 percent). Those districts with the largest number of civil cases pending three years or more (excluding land condemnation cases) were Kentucky, Eastern (1,068 cases); Massachusetts (901 cases); and Connecticut (681 cases). Case categories responsible for much of the three-year-old caseload in these districts were Social Security cases in Kentucky, Eastern and personal injury product liability cases in Massachusetts and Connecticut. Table 10 provides a comparison of civil cases pending three years or more (excluding land condemnation), by district, as of June 30 and December 31, 1982. Additional data on civil cases pending as of December 31, 1982, by age and district, is provided in Appendix Tables C-6A and C-6B.

CRIMINAL WORKLOAD

Summary of Workload

During the twelve month period ended December 31, 1982 criminal cases commenced, terminated, and pending increased for a second year. During 1982, a total of 32,819 cases were filed, an increase of 4.0 percent over the 31,566 cases filed in 1981. Case terminations also rose slightly from 30,197 in 1981 to 31,401 in 1982. Since the rise in filings was greater than the rise in terminations, the pending caseload also increased from 16,176 to 17,594, an 8.8 percent increase. Table 12 is a comparison, by district, of cases filed, terminated, and pending during the twelve month periods ended December 31, 1981 and 1982.

Six Month Statistics

Criminal case filings were up 1.0 percent during the six month period July 1 through December 31, 1982. This increase in case filings represents an upward trend for the third consecutive year. Case terminations, on the other hand, were down 3.1 percent from 15,281 during the six month period in 1981 to 14,800 in 1982. The number of criminal cases filed and terminated during the six month periods from July through December and January through June for each year from 1978 through 1982 is provided in Table 11.

Table 11
U.S. District Court
Criminal Cases Filed, Terminated, and Pending by Half Year
1978 through 1982

	Filings		Terminations		Pending

Percent Change 1982 over 1981	6.8	1.0	11.3	-3.1	8.8

Case Filings by Type of Proceeding

During the twelve month period ended December 31, 1982 felony cases, excluding transfers, increased 9.6 percent over the 20,544 felony cases filed last year. The number of felony cases commenced by indictment, the most common method by which criminal cases are commenced, increased by 8.3 percent from 17,219 in 1981 to 18,655 in 1982. This type of proceeding accounted for 82.9 percent of all felony cases and for 56.8 percent of all criminal cases filed during the year. Felony cases filed by an information, when the indictment was waived by the defendant, increased by 56.3 percent from 583 last year to 911 case filings this year.

Table 13 lists the 11 methods by which criminal cases are commenced in the U.S. district courts. This table also provides data on felony criminal cases filed (excluding transfers) for the twelve month periods ended December 31, 1981 and 1982. Appendix Table D-2 provides the number of cases filed by type of proceeding for all cases.

Case Filings by Offense - Drug Violations Up 25.2 Percent

Case filings, excluding transfers, rose 3.2 percent from 30,725 to 31,695 during the twelve month period ended December 31, 1982. Appendix Table D-2 is a summary of the number of cases and defendants filed for each year from 1978 through 1982 by type of offense. Of the 15 major offense groups listed in Appendix Table D-2, case filings increased in 11 categories and decreased in 4 during 1982.

A major offense category, Drug Abuse Prevention and Control Act, rose from 3,698 to 4,630 cases, or 25.2 percent this year. Substantial increases of 40.0 percent for marihuana violations and 30.1 percent for controlled substance violations were the major contributors to the overall increase in drug prosecutions during this period. DAPCA prosecutions have been increasing each year since 1980 when there was significant increase of 19.1 percent. The major contributing factor to this steady increase has been the marihuana prosecutions which were up by 42.1 percent over 1979.

Prosecution for forgery and counterfeiting also increased, up from 1,881 during 1981 to 2,288 during 1982. Violations of other U.S. forgery (32.8 percent) and postal forgery laws (30.1 percent) were the major factors in the overall increase. This offense category has been on the decline since 1979 when cases fell 25.0 percent. In 1980, prosecutions dropped 25.5 percent and in 1981 the decrease was 0.3 percent. The most significant of the general offense prosecutions that experienced increases this year over last year were: criminal antitrust violations from 56 cases to 88 cases (up by 57.1 percent); Agricultural Act violations from 641 cases to 934 cases (an increase of 57.7 percent); and weapons and firearms violations from 1,559 to 1,781 (up 14.2 percent).

Criminal Case Filings by District Up 4.0 Percent

During the twelve month period ended December 31, 1982 criminal case filings increased by 1,253 cases, or 4.0 percent. Sixty-one districts experienced increases contributing to the overall increase in the number of cases filed, while 33 districts reported decreases, and one district showed no change. A district by district comparison of cases filed, terminated, and pending, including transfers, for the twelve month periods ended December 31, 1981 and 1982 is provided in Table 12.

The seven districts that reported increases of more than 50 percent in case filings were: Maine (100.0 percent); West Virginia, Northern (65.3 percent); California, Northern (59.7 percent); Tennessee, Eastern (57.1 percent); Nevada (56.6 percent); Louisiana, Eastern (54.9 percent); and Illinois, Central (51.3 percent).

The increase in case filings in Maine is primarily due to 16 new filings for traffic violations. The remainder of the increase is spread over all other offenses. In West Virginia, Northern 15 new case filings for marihuana violations, 10 additional filings for forgery and counterfeiting, and the remainder spread among several other offenses accounted for the increase. California, Northern had 34 additional filings for robbery, 48 additional for larceny, and 85 additional filings for embezzlement. Other noticeable increases in the prosecution of specific offenses occurred in Tennessee, Eastern with 53 additional filings for Agricultural Acts and the remainder spread among the other offenses. Nevada and Louisiana, Eastern reported increases in Agricultural Act violations with 99 and 44 additional cases, respectively. Food stamp violations made up the greatest portion of the Agricultural Act violations. Louisiana, Eastern also recorded an increase in forgery and counterfeiting violations (an additional 33 filings) and drug prosecutions (an increase of 29 filings). Illinois, Central reported 36 additional filings for drug violations.

Case filings decreased in 33 districts, 5 of which reported a decrease of 30.0 percent. These five districts were: Georgia, Southern (65.1 percent); Vermont (53.8 percent); New Hampshire (41.2 percent); Tennessee, Western (32.6 percent); and Georgia, Middle (30.1 percent).

The decreases in criminal cases filed in Georgia, Southern and Middle are directly attributable to a temporary exclusion of statistical reports on traffic violations on U.S. government reservations. These traffic violations are misdemeanor prosecutions under state law and, therefore, should be counted as misdemeanors in the Federal system. These cases will be included in the March 1983 twelve month report and should reflect the appropriate criminal statistics for Georgia, Southern and Middle. The 41 case decrease in Vermont and the 21 case decrease in New Hampshire were general and not related to a specific offense. In Tennessee, Western the drop in filings was primarily due to 105 fewer prosecutions for false claims and statements.

Terminations by District

During 1982 criminal cases disposed of in the U.S. district courts rose to 31,401, an increase of 4.0 percent over 1981. This increase was a result of a rise in case terminations in 58 districts.

Nine districts reported increases of more than 40.0 percent. These districts were: California, Northern (103.1 percent); Maine (66.0 percent); Tennessee, Eastern (51.8 percent); Alabama, Southern (51.5 percent); Louisiana, Western (50.7 percent); Virginia, Northern (44.7 percent); Washington, Eastern (44.1 percent); Colorado (41.5 percent); Texas, Western (41.3 percent); and Pennsylvania, Middle (41.2 percent).

Five districts that experienced decreases of more than 30.0 percent in case terminations were: Georgia, Southern (60.7 percent); Canal Zone (55.6 percent); New Hampshire (49.1 percent); Vermont (43.8 percent); and West Virginia, Northern (30.9 percent). (See the explanation regarding the decrease in Georgia, Southern in the section above.)

Pending Cases Increased 8.8 Percent

The pending caseload increased by 8.8 percent during the twelve month period ended December 31, 1982. Seventy-three districts reported more cases pending on December 31 this year than last year on the same day. Decreases in pending cases were reported by 20 districts and 2 districts had the same number of cases pending at the end of this year as last year.

Eight districts reported increases of more than 50.0 percent. These districts were: North Carolina, Western (106.7 percent); Tennessee, Eastern (94.3 percent); Oklahoma, Northern (90.0 percent); North Carolina, Middle (72.1 percent); Guam (64.3 percent); Nevada (56.3 percent); Alabama, Middle (51.9 percent); and Idaho (51.7 percent).

The five districts that showed decreases of more than 20.0 percent in the pending caseload were: Georgia, Southern (33.3 percent); District of Columbia (26.9 percent); Tennessee, Western (23.3 percent); Hawaii (21.7 percent); and Colorado (20.3 percent).

CASES AND MOTIONS UNDER ADVISEMENT

For the fourth quarter of calendar year 1982, U.S. district judges reported 1,369 matters held under advisement over 60 days, an 18.5 percent decrease from the 1,679 matters reported last year. There were 549 district judges, including 130 senior judges, who reported on the status of matters before the court, compared to 526 district judges for the same quarter last year (see Table 14). While 327 judges (59.6 percent) reported no matters held under advisement over 60 days, 222 judges (40.4 percent) reported matters held under advisement on December 31, 1982.

[1] Included in total.
[2] Does not include Senior Judges.

The 222 judges having matters held under advisement reported a total of 1,369 cases and motions. Of these, 854 cases and motions (62.4 percent) were held under advisement over 60 days but not more than six months; 378 cases and motions (27.6 percent) were held under advisement over six months but not more than one year; and 137 cases and motions (10.0 percent) were held over one year. The district judges of the Seventh Circuit reported the largest number of matters held under advisement with a total of 287 matters or 21.0 percent, while district judges in the District of Columbia Circuit reported only 11 cases or 0.8 percent of all matters reported.

Table 15 provides the distribution by circuit of cases and motions held under advisement over 60 days in the U.S. district courts on December 31, 1982.

JUROR USAGE

The following section is a summary of grand and petit juror activity in U.S. district courts during the six month period July 1 through December 31, 1982. Much of the petit juror data for this period is not comparable to prior years because it reflects juror usage for selection days only whereas data for previous years reflect overall juror usage. The only comparable petit juror statistics are shown in Table 18. Comparisons of one district to another have been made within the six month period, but do not include the Virgin Islands, Guam, and the Northern Mariana Islands due to the unique circumstances in these courts.

Grand Juror Activity Rises Slightly

Grand jury activity increased during the six month period ended December 31, 1982. The total number of grand jury sessions convened rose 3.3 percent from 5,062 in 1981 to 5,228 in 1982. This figure, however, remained slightly below the all-time high of 5,352 grand jury sessions recorded in 1980. As a result of the rise in grand jury sessions, there were 3,168 more jurors in session (up 3.1 percent) and 842 more hours in session (up 3.2 percent). Table 16 is a summary of grand juror data for the six month periods ended December 31, 1978 through 1982. Appendix Table J-1 provides, by district, the number of grand juries in existence, sessions convened, jurors in session, hours per session, the average number of jurors per session, and the average number of hours per session.

Table 16
U. S. District Courts
National Grand Juror Statistics
During the Six Month Periods Ended December 31, 1978 through 1982

Grand Jurors and Juries	1978	1979	1980	1981	1982	1982 over 1981	
						Number Change	Percent Change

Hours Per Session	5.23	5.22	5.22	5.25	5.24	-	-
Total Number of Grand Juries:							
In Existence	506	528	571	583	557	-26	-4.5
Impaneled	143	141	161	153	147	-6	-3.9
Discharged.............	137	157	165	179	157	-22	-12.3

There were 557 grand juries in existence during the six month period, a modest 4.5 percent decline over last year. The Eastern District of New York reported the largest numerical decrease from 40 grand juries in 1981 to 29 grand juries in 1982. This decline was primarily due to a change of policy in the U.S. attorney's office. In past years, only one assistant U.S. attorney presented cases before each grand jury. This year, three or four assistant U.S. attorneys presented evidence before the same grand jury, thereby reducing the need for impaneling additional grand juries. Compared to 1981, there were 6 fewer grand juries impaneled and 22 fewer grand juries discharged. New York, Southern reported the most grand juries with 42, while 9 districts reported only 1 grand jury in existence.

Primarily due to its status as the nation's largest and busiest district court, the Southern District of New York reported the greatest amount of grand jury activity with 463 sessions convened, 9,372 jurors in session, and 1,966 hours in session. Conversely, excluding the territorial courts, North Dakota reported the least amount of grand jury activity with only 5 sessions convened, 113 jurors in session, and 28 hours in session.

Between 16 and 23 jurors need to be present before a grand jury session can be convened. Nationally, the average number of grand jurors per session was unchanged from last year at 19.9. The individual districts ranged from a high of 22.6 jurors per session in North Dakota to a low of 18.2 in North Carolina, Western. The average number of hours per session has remained virtually the same since 1978 and was 5.24 in 1982. Alaska; Oklahoma, Northern; and West Virginia, Northern reported the highest averages at 8.00 hours per grand jury session. Conversely, Vermont recorded the lowest average at 3.66 hours per grand jury session. Vermont's low average is due, in large part, to the types of cases presented to their grand juries. Being a border state, Vermont has numerous illegal entry cases. These cases take very little time for the U.S. attorney to present and, consequently, the grand jury remains in session for only two or three hours.

Table 17 provides the number of cases commenced by indictment and the number of defendants proceeded against by indictment during the six month period ended December 31, 1982. Continuing a three year increasing trend, the number of cases commenced by indictment and the number of defendants proceeded against by indictment rose 11.4 percent and 11.1 percent, respectively. An average of 1.58 defendants per case were indicted through the grand jury process.

Table 17
U. S. District Courts
Proceedings by Indictment and Grand Jury Sessions
During the Six Month Periods Ended December 31, 1978 through 1982

Year	Proceedings Commenced by Indictment		Average Defendants per Case	Grand Jury Sessions Convened	Average Defendants Indicted per Grand Jury Session	Hours in Session	Average Hours per Session
	Cases	Defendants					
1978 . . .	9,146	12,553	1.37	4,439	2.83	23,209	5.23
1979 . . .	7,841	11,960	1.53	4,689	2.55	24,469	5.22
1980 . . .	8,097	13,093	1.62	5,352	2.45	27,961	5.22
1981 . . .	8,689	13,773	1.59	5,062	2.72	26,562	5.25
1982 . . .	9,677	15,307	1.58	5,228	2.93	27,404	5.24

After a five year decline, the average number of defendants indicted per grand jury session began to climb in 1981 and this trend continued in 1982. The average of 2.93 defendants indicted per grand jury session is the highest since 1977. This is due, in part, to the concerted efforts of the U.S. Department of Justice and the U.S. attorneys to make more effective use of grand juries.

Petit Juror Statistics Now Highlight Jury Selections

In previous publications, petit juror statistics reflected overall juror usage, but now for the first time jury selection activity is being highlighted during the six month period ended December 31, 1982.

After examining jury management practices in Federal courts, the General Accounting Office (G.A.O.) recommended that the Administrative Office (A.O.) revise the method of collecting juror statistics. The recommendation was based on criticism of the Juror Utilization Index (J.U.I.) as a measure of a court's efficiency. The J.U.I., the average number of jurors available for each jury trial day, was calculated by dividing the total number of available jurors by the total number of jury trial days. According to G.A.O., this index was heavily influenced by trial length and when used to gauge juror usage, it often overstated a court's efficiency. G.A.O., therefore, recommended that juror statistics focus on the initial day of jury selection, thereby eliminating the effect of lengthy trials. The House Appropriations Committee agreed with the G.A.O. findings. The Judicial Conference Committee on the Operation of the Jury System subsequently directed the A.O. to comply with G.A.O's recommendations. The petit juror reporting form was revised to distinguish activity on jury selection days from activity on days after the jury was selected. The courts began reporting on the new form in July 1982.

Table 18 represents a historical overview of the total number of available jurors (people called to court to serve), and the total number of jury trial days (the number of days a jury trial was in progress) from July to December 1978 through 1982. A total of 5,799 fewer jurors were called to serve during this period in 1982 compared to last year. This 1.9 percent decrease marks the second consecutive year that attendance activity has slowed slightly during this period. The number of jury trial days increased slightly from 16,498 days to 17,013 days, with civil jury trial days accounting for 54.7 percent of the total days.

Table 18
U. S. District Courts
National Petit Juror Usage
During the Six Month Periods Ended December 31, 1978 through 1982

Petit Jurors	1978	1979	1980	1981	1982	1982 Over 1981

Percent	47.8	47.7	53.5	54.2	54.7	-	-

Appendix Table J-2 provides a district breakdown of petit juror voir dire activity during the six month period in 1982. Though the categories of juror service remain as selected, challenged, and not selected, serving, or challenged, three factors that distinguish the new 1982 categories of juror service from previous years should be noted. First, unlike the selected category of prior years, the 1982 selected category no longer includes jurors who returned for a second day of trial, third day of trial, etc. Second, since challenges occur on voir dire days only, the actual number of challenges during the six month period is comparable to prior years, but the percent that the challenged jurors represents is not comparable. Finally, the not selected, serving, or challenged category no longer includes jurors who returned to court to serve on a subsequent day but were not used, nor jurors who were in travel status to or from court.

For the category of jurors selected, the national average was 29.8 percent with South Carolina reporting the highest percentage (58.5 percent). Judges in this district routinely reuse jurors on more than one case to maximize juror usage. For example, it is not uncommon for more than ten juries to be picked on a single day in this district. The extensive use of multiple voir dire resulted in this district's high percentage of jurors selected and low percentage of jurors not selected, serving, or challenged. The Northern District of Ohio reported the smallest percentage of jurors as selected with 15.2 percent.

An average of 31.9 percent of the jurors present for voir dire or orientation were challenged either peremptorily or for cause. Alaska reported the lowest percentage of jurors as challenged (15.4 percent) only because 5 of the 15 scheduled jury selections did not reach the challenging stage. Due to one judge's illness, two last minute settlements and one defendant's waiver of a jury trial, the five panels were unused.

Hawaii reported the greatest percentage of jurors as challenged with 53.0 percent. This district averaged 22 challenges per criminal case and 16 challenges per civil case. Challenges in civil cases, however, were inflated by a notorious civil antitrust case involving the city and county of Honolulu and two local newspapers. In this case alone, there were 32 challenges (14.5 percent of total challenges in this district).

Jurors Not Selected or Not Challenged

Jury administrators agree that the not selected, serving, or challenged category is where efficiency in juror usage can be improved substantially. Several factors hinder improvement in this category. From the standpoint of Congress and G.A.O., jurors not selected, serving, or challenged represent citizens' time and government's money "wasted." Each litigant, however, is entitled to a certain number of challenges during a jury selection as well as an opportunity to settle in a civil case or plead guilty in a criminal case up to the last minute. Any of these options could result in "wasted" jurors. An additional problem arises when jury managers call the appropriate number of jurors to cover all anticipated challenges in a case, all anticipated challenges are not exercised, and the unchallenged jurors are ultimately reported as not selected, serving, or challenged.

For the six month period ended December 31, 1982, the Northern District of Ohio reported the greatest percent of jurors as not selected, serving, or challenged with 69.1 percent. Two factors caused this disproportionate number of unused jurors. In November, there was a notorious organized crime case in Cleveland, Ohio which involved multiple defendants. A total of 572 jurors were called for this case alone. In a process that lasted six days, each prospective juror was required to complete a 23 page questionnaire. Based on the questionnaire, excuses were granted during the first five days. Selection began on the sixth day with a panel of 55 qualified jurors, resulting in 18 jurors selected, 31 challenged, and 6 not selected or challenged. In addition to this well publicized case, there were 15 occasions when the entire panel called was not selected, serving, or challenged during the six month period. Last minute settlements and plea changes accounted for the majority of the cancelled selections.

In the Southern District of Alabama, only 21 jurors (3.0 percent) were reported as not selected, serving, or challenged. This district consistently reports a small number of jurors in this category, primarily due to the judges' extensive use of the multiple voir dire technique of selecting jurors. No more than four jurors were reported as not selected, serving, or challenged on any single day during the six month period.

A total of 4,409 civil and criminal juries were selected during the six month period. Of these, 3,453 trials (78.3 percent) began on the same day that the jury was selected. The 956 remaining trials either started at a later date or did not start at all.

Most districts that picked over 100 juries during the course of the six month period included large metropolitan courts such as New York, Southern (New York City) where 168 juries were picked; Pennsylvania, Eastern (Philadelphia) where 150 juries were picked; and Florida, Southern (Miami) where 152 were picked. In all of these districts, trials always began on the same day that the jury was selected unlike South Carolina, which selected the largest number of juries (205) but started only 21 trials on the selection day.

FEDERAL DEFENDER ORGANIZATIONS

A new Federal public defender organization for the District of Hawaii began representing defendants in December 1982, raising the total number of defender offices to 40. Of the 40 defender organizations, 33 are Federal public defenders and 7 are community defender organizations.

Table 19 summarizes the number and type of cases opened, closed, and pending in the defender organizations during the last four years. Appendix Table K-1 provides detailed statistical information on the case activity of each office during the six month period ended December 31, 1982. The information is classified into three major categories of representations: criminal, appeals, and other. The last category includes representations for habeas corpus, parole/probation revocation, witness, and motions to correct or reduce sentence. The statistics in this report cover only those representations provided by Federal public/community defenders and, therefore, exclude representations by private panel attorneys under the Criminal Justice Act of 1964. Those statistics are available in the **Report to the United States Judicial Conference Committee to Implement the Criminal Justice Act.**

During the six month period ended December 31, 1982, Federal public defenders were assigned 12,272 cases, up 12.1 percent from 1981. Federal public defenders accounted for approximately 70 percent of these representations and the community defenders accounted for the rest. The 33 Federal public defenders reported a 16.5 percent increase in new cases, while the 7 community defender organizations experienced a modest 3.0 percent rise in new cases.

Appeals Representations Increase 22.6 Percent

All three categories of representations (criminal, appeals, and other) showed increases. The largest percentage rise was in the number of appeals representations from 340 in 1981 to 417 in 1982. Much of this increase is attributable to Florida, Southern where the number of appeals almost tripled. These appeals primarily involve the review of drug related convictions. Despite the 22.6 percent increase, appeals representations comprise a mere 3.4 percent of all defender representations. Criminal representations account for two-thirds of the defender workload and other representations account for 30.0 percent. One-seventh of the other representations are court-directed prisoner representations of inmates at the U.S. Medical Center for Federal Prisoners at Springfield, Missouri.

Nevada reported the largest percentage increase among the 40 offices. This district opened 307 new cases, a substantial 93.1 percent rise over 1981. This increase was primarily due to the efforts of the U.S. attorney's office in investigating and prosecuting food stamp fraud. There were 98 food stamp cases during 1982, compared to 1 in 1981.

Puerto Rico also reported a significant increase in representations. The 76.1 percent rise in assigned cases was caused, in large part, by a dramatic increase in drug cases spurred by the U.S. government's declared "war" on drugs. Overall, 27 offices experienced an increase in their caseload. The Southern District of California reported the largest number of case openings with 1,703, while Georgia, Southern and West Virginia, Southern reported the fewest number of case openings. Both of these offices were assigned 82 cases.

The largest decline in cases opened was reported by the Western District of Tennessee. This 36.8 percent decrease in representations illustrates how the U.S. attorney's office may influence a defender's workload. During 1982, Tennessee, Western reported 19 "other fraud" cases, which primarily consisted of welfare and food stamp fraud. This was a sharp decline from the 89 "other fraud" cases reported in 1981 when the U.S. attorney's office was much more active in pursuing welfare fraud cases. Large declines in representations were also reported by Ohio, Northern (down 20.2 percent); Georgia, Southern (down 16.3 percent); and Oregon (down 16.3 percent).

Federal defenders disposed of 12,016 cases, an increase of 8.4 percent over the 11,083 cases disposed of in 1981. Of the cases closed, 8,023 (66.8 percent) were criminal matters; 322 (2.7 percent) were appeals; and 3,671 (30.5 percent) were other representations. Approximately two-thirds of these cases were terminated by Federal public defender offices and one-third were terminated by community defender offices. The community defender organization in the Southern District of California reported the most dispositions with 1,697. Missouri, Western closed the most cases among Federal public defenders, reporting 790 dispositions. Conversely, Ohio, Northern terminated the fewest cases, closing only 66 cases.

The largest percentage increase among the 27 offices reporting rises in their case closings was registered by Nevada with 323 dispositions. This represented a 75.5 percent increase over the 184 cases closed in 1981. Again, the rise was primarily due to the food stamp fraud cases filed in the district court by the U.S. attorney's office. South Carolina and Massachusetts also experienced large increases in their number of dispositions, reporting increases of 65.3 percent and 57.0 percent, respectively. The largest declines in terminations were reported by Ohio, Northern (down 41.1 percent); Georgia, Southern (down 36.9 percent); and Tennessee, Western (down 36.8 percent).

Hours in Court Average 1.8 Hours

Federal defenders spent an average of 1.8 hours in court per closed case. The Central District of California and the New York organizations were in court an average of 3.4 hours per closed case, the highest average among the 40 offices. The New York organization reported numerous time consuming postal and wire fraud cases, while California, Central's caseload was highlighted by three murder trials. The defender was in court an average of 37.0 hours for each of these trials. The lowest average was recorded by Missouri, Western. Their average of 0.5 hours in court per closed case is primarily due to the negligible time needed to dispose of the court-directed prisoner representations of inmates at the U.S. Medical Center in Springfield, Missouri.

Pending Cases Increase by 14.5 Percent

The pending caseload continues to grow, increasing 14.5 percent to 7,015. Puerto Rico reported the largest percentage increase as its pending caseload rose 306.7 percent from 15 cases in 1981 to 61 cases in 1982. The largest numerical increase, however, was recorded by Florida, Southern. Their pending caseload increased by 338 to 1,204 and accounts for over 17 percent of the total number of pending cases. The majority of the increase is due to the large number of drug cases being filed as a result of the Justice Department's special task force on narcotics activity in South Florida. Conversely, three offices, California, Northern; South Carolina; and Tennessee, Western, were able to reduce their pending caseload by more than 30 percent.

Summary of Workload

During the twelve month period ended December 31, 1982, a total of 545,408 estates were filed in the U.S. bankruptcy courts, representing an increase of 4.1 percent over the 523,825 estates recorded in the previous year. Similarly, the number of estates terminated rose to 445,573, or 16.2 percent above the 383,481 disposed of a year ago. In spite of the dramatic increase in bankruptcy estate terminations, the pending caseload continued an upward trend, rising to 786,387 estates, 14.5 percent over 1981. A summary of the bankruptcy caseload during the twelve month periods ended December 31, 1981 and 1982 is provided in Table 20. Additional data on the bankruptcy workload during the twelve month period ended December 31, 1982, are provided in Appendix Tables F-1, F-2A, F-2B, F-3A, F-3B, F-3C, and F-3D.

1982	545,408	445,573	786,387
Percent Change 1982 over 1981	4.1	16.2	14.5

Bankruptcy Estates Filed Increase 4.1 Percent

The number of bankruptcy estates filed in the U.S. bankruptcy courts showed an increase of 21,583 (4.1 percent), during the year ended December 31, 1982. This figure includes 380,212 Code cases (164,833 of which are joint petitions), and 363 Act cases (those cases originally filed under the Bankruptcy Act prior to October 1, 1979 and reopened during this period). While the overall increase in the number of bankruptcy estates was 4.1 percent, the changes in individual circuits vary widely, as indicated by the comparison shown in Table 21. The changes in bankruptcy filing activity range from an increase of 14.3 percent in the Ninth Circuit to a decline of 12.4 percent in the Second Circuit. Overall, 60 districts experienced increases in filing activity, the largest of which was in California, Central, where filings increased 31.0 percent from 35,333 in 1981 to 46,278 in 1982.

Table 21

Filings October through December

During the three month period October through December 1982, a total of 138,008 estates were filed, an increase of 7.0 percent over the comparable period a year ago. The second quarter of 1983, however, represents a decline of 1,084 estates, or 0.8 percent from the high of 139,092 filed in the previous quarter. Table 22 is a summary, by quarter, of the number of bankruptcy estates filed from July 1, 1977 through December 31, 1982.

Table 22
U.S. Bankruptcy Courts

1981	2.7	1.1	-0.1	3.0	1.7
1977	140.6	139.4	152.6	152.4	146.2

Bankruptcy Terminations Up 16.2 Percent Over Last Year

Bankruptcy estate terminations rose substantially to 445,573 estates, up 16.2 percent compared to the previous twelve month period. The number of estate terminations is comprised of 287,443 Code cases (122,622 of which are joint petitions), and 35,508 Act cases. Sixty-one districts experienced increases in termination activity in 1982. The most significant increases were in California, Central, where estate terminations increased from 24,235 in 1981 to 38,840 in 1982 (60.3 percent) and in Indiana, Southern, where terminations increased from 10,559 to 16,009 (51.6 percent).

Pending Bankruptcy Estates Reach an All Time High

As a result of the increase in filings, the pending caseload reached a record high in the U.S. bankruptcy courts. The pending caseload jumped from 686,552 in 1981 to 786,387 in 1982, a rise of 14.5 percent. The 786,387 pending estates include 511,018 Code cases (226,796 of which are joint petitions), and 48,573 cases filed under the Bankruptcy Act. Despite the rise in the overall caseload, 13 districts were able to reduce their pending cases during 1982. The most significant decline was in Indiana, Southern where, due to the large increase in termination activity, the pending caseload dropped from 13,817 in 1981 to 8,747 in 1982.

Adversary Proceedings Increase by 37.9 Percent

As the number of bankruptcy case filings has increased, so has the number of adversary civil actions arising out of these cases. During the twelve month period ended December 31, 1982, a total of 161,061 such actions were filed in the U.S. bankruptcy courts, an increase of 37.9 percent over the 116,799 filed last year. Seventy-nine districts experienced increases in the filing of adversary proceedings with four districts (Pennsylvania, Eastern; California, Central; Puerto Rico; and Texas, Eastern) more than doubling their workload. Table 23 is a comparison of adversary proceedings filed, by district, during 1981 and 1982. More detailed data on adversary proceedings is contained in Appendix Table F-1AP.

National Total of Persons Under Supervision Remains Stable

On December 31, 1982, there were 58,496 persons under supervision in the Federal Probation System, an increase of 104 over the number under supervision at the end of last year. The number of persons under supervision of district courts increased 1,670 or 4.1 percent overall since last year. Persons supervised after release from institutions, on the other hand, declined by 1,566 or 9.0 percent.

As shown in Table 24, probationers under supervision on court-imposed terms and those serving terms imposed by U.S. magistrates increased 869 and 641, respectively. Persons serving under conditions of pretrial diversion also increased by 160 or 7.9 percent. A decline of 1,310 in the number of parolees supervised at the end of this year accounted for most of the overall decrease of 10.2 percent in persons supervised after release from institutions.

Table 24
Persons Under Supervision
On December 30, 1981 and 1982

Type of Supervision	1981	1982	Increase or Decrease	Percent Change
Total	58,392	58,496	104	0.2
From District Courts	40,956	42,626	1,670	4.1

Military Parole	446	403	-43	-9.6

Appendix Table E-2 provides the number of persons under each type of supervision by district. Appendix Table E-3 provides the number of persons under supervision by offenses for which supervision was originally imposed.

Fourteen Districts Report Increases in Supervision Caseload of 10.0 Percent or More

In contrast to the small rise of less than one percent in the national caseload this year, 14 districts reported increases of 10.0 percent or more in their caseloads. (See Table 25.) Four districts reported increases of 100 or more persons under supervision. Maryland reported an increase of 231 persons resulting from a significant increase in probationers serving terms imposed by U.S. magistrates for traffic offenses. California, Northern (up 166) and Illinois, Northern (up 126) reported more persons under supervision at the close of this year due to increases in probationers serving terms for embezzlement and fraud. Nevada gained 100 more persons in its caseload as a result of an increase in magistrate probationers supervised after "other" special offenses, specifically national park violations and fraudulent food stamp claims and sales.

Nearly all districts had reductions in the number of persons supervised after release from institutions, but most districts had compensating gains in probationers. Losses in probationers combined with the losses in institutional releasees, however, caused declines of 10.0 percent or more in the caseloads of ten districts. Four of these districts experienced reductions of more than 100 persons under supervision. These districts were: District of Columbia (down 207); Pennsylvania, Western (down 107); California, Central (down 103); and Kentucky, Western (down 102).

One-half of all districts (46) gained more persons under supervision during the year and 45 districts reported declines. Two districts, Vermont and Illinois, Southern showed no change since last year in their respective caseload totals. The Northern Mariana Islands reported their first supervision case during the past year, while the 106 persons supervised in the Canal Zone at the close of last year were all removed from supervision or transferred by March 21, 1982 when the court and probation office closed in accordance with the Panama Canal Treaty.

---

[1] This table includes data on jury selection days only. Data on juror service after the selection day are not included. Therefore, a district that selects a jury on one day and begins the trial at a later date will show juror activity but will not show trial activity.

[2] Indicates those districts which have not adopted local rules reducing the size of civil juries.

Note: Due to rounding, percents may not add to 100.0 percent.
